		1	,	Gable roofs are 6:12 pitch or steeper; Hip roof* is 4:12 pitch or steeper
ROOF	5	1		Roofs are shingle (wood/asphalt), metal or standing seam roofs
		1		Roof overhangs extend a minimum of 12 inches on all elevations
		4	/	Any large roofs are broken up with shifts in height, cupolas, eyebrows, chimneys, dormers, bumpouts or other features that minimize the apparent bulk of the building and provide character. A large roof is defined as a roof of 40 feet or greater in length. (One of two side elevations and front elevation must meet criteria)
LANDSCAPE		1	<b>\</b>	The front yard of the property shall be landscaped with shrubs or sod (grass seed only, will not receive a point)
Focus on Energy Certified	4	4	/	Builder receives Focus On Energy Certified Home Recognition, currently that the home is certified as being 25% - 100% more energy effecient than Wisconsin Uniform Dwelling Code. *
Total	(34)	36		

Project must score at least 30 points or greater to be built on a city-owned vacant lot. (In addition to meeting other criteria)

If there are changes in exterior materials and color, they should occur between horizontal bands and be used to establish a base, middle, or top portion of the house. No vinyl less than .044 or concrete block used as a finish material.

Exceptions to basement criteria may be made for accessibility concerns or for flood plain concerns.

Exceptions will be considered where buildings employ other distinctive window or face treatment that adds depth and visual interest to the building.

\*When utilizing a hip roof, the ridgeline shall be broken up or front porch shall have a separate roof

Exceptions to the roof ridgeline requirement may be made for narrow properties. For large roof requirement this applies to all side elevations facing a street.

\* An analysis based on plans will be done to verify the home will meet the Focus on Energy Certification. Then two sites visits will be conducted to verify. The costs for these tests will be covered by the City of La Crosse and performed in-house. Buyer will forfeit security deposit if the final test does not show that their home meets Focus on Energy
