ORDINANCE NO.: 5157

AN ORDINANCE to amend Section 115-398 of the Code of Ordinances of the City of La Crosse regarding fences and hedges.

THE COMMON COUNCIL of the City of La Crosse do ordain as follows.

SECTION I: Section 115-398 is hereby amended to read as follows:

Sec. 115-398. - Fences and hedges.

- (a) **Fences defined.** For the purpose of this Section, a "fence" is herein defined as a barrier consisting of vegetation, wood, stone, vinyl, brick, fieldstone, wrought iron, or metal intended to prevent ingress or egress. For the purposes of this section, the term "fence" shall include plantings, such as hedges and shrubbery in the front yard in excess of 4 feet tall. No fence shall be constructed of unsightly or dangerous materials which would constitute a nuisance.
- (1) Fences to be situated in side and/or rear yards shall be constructed using materials suitable for residential-style fencing, including, but not limited to, brick, fieldstone, wrought iron, vinyl, chainlink (with a minimum thickness of nine gauge and a required top rail support), stockade, or board-on-board wood. With the exception of a fence that sits atop decorative retaining wall or decorative stone wall which is a part of the fence, no fence or fence panels shall be constructed with multiple building materials or more than one pattern of the same materials on any given lot line (for example, a wooden stockade fence cannot be constructed with a wooden picket fence as part of the same fence). This shall not prohibit two intersecting fences from having different materials if the fences are owned by different property owners.
- (2) No fence shall be constructed of used or discarded materials in disrepair, including, but not limited to, pallets, tree trunks, trash, tires, junk, or other similar items. Materials not specifically manufactured for fencing, such as, but not limited to, railroad ties, doors, landscape timbers or utility poles, shall not be used for, or in the construction of a fence.
- (3) Agricultural/farm fences shall only be permitted in agriculturally zoned or used districts and can only exceed six feet with a conditional use permit.
- (4) Fences associated with baseball and/or softball fields and surrounding tennis courts may be erected in conformance with accepted industry standards. A Fence Permit shall be required for such installation.
- (5) The La Crosse Regional Airport shall be allowed to erect chainlink fences for security purposes up to ten feet in height plus up to three strands of barbed wire. The three strands of barbed wire may face away from airport property. A fence permit shall be required for such installation.
- (6) Any fence built in an Industrial Park that has recorded covenants in regards to fences, the covenants shall apply. A fence permit shall be required for such installation.
- (b) **Fences categorized.** Fences shall be categorized into six classifications:
- (1) **Boundary fence.** A fence placed on or within three feet of the property lines of adjacent properties.
 - (2) **Protective fence.** A fence constructed to enclose a hazard to the public health, safety and welfare.
 - (3) **Architectural or aesthetic fence.** A fence constructed to enhance the appearance of the structure or the landscape.
 - (4) **Hedge.** A row of bushes or small trees planted close together which may form a barrier, enclosure or boundary in the front yard.
 - (5) **Picket fence.** A fence having a pointed post, stake, pale or peg laced vertically with the point or sharp part pointing upward to form a part of the fence.
 - (6) **Dog kennel fence.** A chainlink enclosure which is enclosed on three or four sides in the side or rear yard of a property.
- (c) **Height and setback of fences regulated.**
- (1) Residential fences are permitted up to the property lines in Residential Districts but shall not, in any case, exceed a height of six feet without a conditional use permit, shall not exceed 48 inches in height from grade. In the front, side, or rear yard setback abutting a public sidewalk, shall not encroach into any vision corner and shall not be closer than three feet to any public right-of-way along a public alloy. The height of any fence shall be measured as an average and shall not include the posts or pillars to which a fence is attached.
- a. Decorative wrought iron, brick, stone, PVC or painted picket style fences less than 48 inches (average) in height from grade or decorative lot corner landscape may be placed up to the property line in Residential Districts and shall not violate vision corner ordinances pursuant to this section.
 - b. Chainlink and unpainted unstained fencing is not permitted in residential front, side or rear yards abutting a public sidewalk.
 - c. A fence located in an interior side yard between dwellings shall not exceed four six feet in height. However, a fence may be erected to a height of six feet if the entire fence is constructed of wrought iron or similar open construction or if the area above four feet is at least 50 percent open. An example of the latter is a fence that is opaque to a height of four feet and is topped with not more than two feet of lattice. Any interior side yard fence may be erected to a height of six feet if it is located more than ten feet from the side wall of the adjacent neighboring dwelling.
 - d. A fence located in a rear yard abutting a public sidewalk may be erected to a height of six feet if the entire fence is constructed of wrought iron or similar open construction or if the area above four feet is at least 50 percent open. An example of the latter is a fence that is opaque to a height of four feet and is topped with not more than two feet of lattice. A fence as specified above may be located in a side yard on the street side of a corner lot behind the principal structure.
 - e. All fences must be constructed and maintained in a good state of repair and appearance. The finished side or decorative side of a fence shall face adjoining property.
- f. a. Any fences adjacent to or encroaching into alloy right-of-way that are required to be removed for construction related causes during a City alloy project may be reconstructed within the three-foot setback, provided they are reconstructed outside of the right-of-way using the property line established by the Engineering Department during the project without the requirement of a Certified Survey Map.
- (2) No fence, wall, hedge, or shrubbery shall be erected, placed, maintained or grown along a lot line on any non-residentially zoned property, adjacent to a residentially zoned property, to a height exceeding eight feet.
- (3) Property owners shall locate fences no closer than three feet from the property line so that each side of the fence may be properly maintained by the owner of the fence while on said owners property, unless an affidavit in recordable form is provided signed by the adjacent property owners agreeing to maintain the opposite side of the fence or agreeing to permit the owner of the fence to maintain said fence. This requirement can be waived if a maintenance free fence is installed.
- (4) In the case of a proposed fence installation within three feet of a lot line where no record of a fence existed, a survey prepared by a registered land surveyor or professional engineer is required to obtain a building permit. No survey is required if a recordable affidavit signed by all affected property owners establishes an agreed upon lot line. No permit shall be issued for a fence three feet or closer to a lot line until the adjacent property owners have been notified in writing by the Fire Department - Division of Fire Prevention and Building Safety and 15 days have passed. If a recordable affidavit is provided, the 15 day period can be waived.

3) Features permitted without a permit. The following types of features are permitted, as specified, without a permit:

- a. Structures permitted within a block. The following types of structures are permitted, as specified, without a permit:
 - i. Small structures, such as sheds, garages, or tool sheds, which do not interfere with public rights-of-way, or block access, and provide a drainage problem for the adjacent or downstream properties.
 - ii. Barns, stables, or other agricultural buildings, which do not interfere with public rights-of-way, or block access, and provide a drainage problem for the adjacent or downstream properties.
- b. Features not requiring a permit. Agricultural features, such as silos, grain bins, and feed troughs, which do not interfere with public rights-of-way, or block access, and provide a drainage problem for the adjacent or downstream properties.
- c. Any manner which presents a hazard to pedestrian or any public or private sidewalk.
