Subject:

Dear Council Member Janssen,

As someone whose property tax just went up \$800, I encourage all council members to avoid spending our tax dollars and your time on nothing issues. One of these is the preposterous notion that human beings have the ability to change the climate. There is no evidence for it. None. It's just another Big Lie, fodder for the masses. Look out the window.

Examine our climate since early November. Severe cold temps. You should see my heating bill. These temps were not supposed to happen we were told. We were told the earth was heating up, coastal cities would be underwater, the trout were in danger, farmer's crops would be burnt to a crisp, snow would be a thing of the past, the poor polar bears were dying off, and we have only 8 or 9 years left to save the planet. That last prediction has terrorized a lot of children. And none of them has come true. Now get this: there is no substitute for fossil fuels. Wind and solar are a joke. If you think otherwise, you've been deceived. See left wing producer Michael Moore's documentary, "Planet of the Humans." Council members, a belief in something for which there is no evidence is either foolishness or religion. I would hope when you vote on these climate change measures, you are not foolish.

Sincerely,

Chip DeNure
