Scoreboards

- **Current Status**
 - Are current scoreboards were purchased in the late 1980's.
 - Daktronics will not service anymore. Independent vendors have to be searched out to provide servicing.
 - 2 Drives on the main scoreboard are nonoperational. These drives control the quarter/period settings and the possession arrows.
 - Controller parts are beyond repair. Out of the 5 controllers 3 sub-controllers have aspects that don't work and a 4th sub-controller is nonfunctional.
 - **Improvements with new equipment**
 - Fully functional scoreboard
 - Replacement allows for much easier operations and training.
 - Included are LED light strips which are standard in the sport. Current shot clock light is a mounted light on the top of the back board.
 - Also included are the possession arrows on the scorers table which are not part of the existing equipment.
- **Cost \$70,452.00**
 - **SOF 26 LCC Room Tax**

Basketball Hoops

- Current Hoops are Hydra Ribs. Purchased in the late 1980's.
- Hydraulics are failing.
- Backboard not at the industry current standards.
- New boards will allow for the mounting standards for both the shot clocks and the LED lighting strips.
- Proposed Spalding NBA Renegade Basketball hoops are the official back board of the NBA and NCAA.
- Padding and floor anchor are included.
- Installation and Freight included in the estimated cost.
- **Cost \$40,510.00**
- **SOF....26 LCC Room Tax**

Fly System

- Fly system is original with venue – 38 years.
- Motors and electrical systems are wearing out. Some electrical has had dry rot and failed.
- The fly system handles touring scrims, house lighting and curtain package.
- We are requesting replacing this fly system with a portable system.
 - **Estimated Cost**
\$400,000.00
 - **SOF...4 New Bonding**
over 2 years 2020-2021.

Stage

Current stage has a number of sections that are becoming safety issues.

Current stage is over 25 years old.

New stage will not match up with the old so the option of purchasing replacement decks is not available.

Latching and locking mechanism are failing.

Broken support system underneath on many panels won't hold some of the heavy props and equipment we are seeing with touring shows.

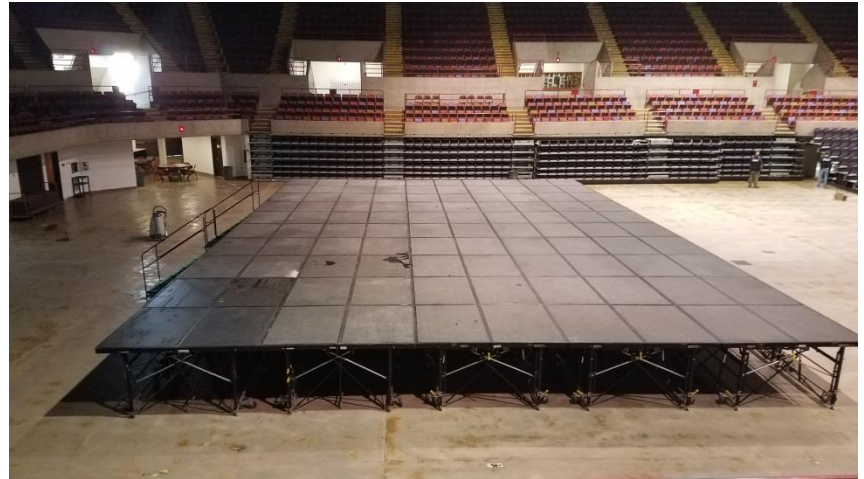

New system would

*Go up and down much quicker.

*Provide a safer environment

COST \$350,000.00

**SOF 4...New Bond
Issue**

La Crosse Center Van

- Current Mini Van is a Chevrolet Uplander passenger.
- 92,399 miles
- Van used for sales trips and for touring shows for “runners” taking care of the artists, food runs, moving band and support staff around. Also used for regular venue use on a day to day basis.
- Van holding some trade in or sales value....estimated between \$3,500 to \$4,000
 - **Cost \$30,000.00**
- **SOF 26 LCC Room Tax**
