**Product Overview**

## **\*Minimum of 10 Required (Fee applies to orders of less than 10)**

One of the most reliable barricades on the market, the 8.5 Foot Heavy Duty Steel Barricade is made from marine-grade, hot-dipped galvanized steel. At 8.5 feet long, these barricades will cover more ground than most other barricades on the market. The premium hot-dipped galvanized coating and 16 gauge steel make it the ideal barricade for any weather condition. With its simple interlocking design, the 8.5 Foot Heavy Duty Steel Barricade can easily be hooked to another to create a long, continuous line of protection. All 8.5 Foot Heavy Duty Steel Barricades come with removable feet that can be customized to fit a variety of landscapes and flooring types.

### **Resources:**

[Barricade Specification Sheet](#)

## **Strength & Durability**

The hot-dipped galvanized steel creates a comprehensive rust-proof seal, helping increase longevity and decrease corrosion. The barricades are hot dipped galvanized after construction and welding to fully weatherproof the entire barricade. Each barricade measures 8.5 feet long and weighs 44 pounds — all made from solid 16 gauge steel. The mainframe is composed of 1.5-inch diameter steel tube and contains 21 upright barricade bars to provide adequate protection and security.

## **Simple Interlocking Design**

All 8.5 Foot Heavy Duty Steel Barricades can link together to block off large sections or specific areas. Through a simple hook and loop design, each of the two hooks on the right side of the 8.5 Foot Heavy Duty Steel Barricade will drop directly into the two loops on the left side of the proceeding barricade. When the barricades are locked together, they can only be unhooked from the ends to help with stability and security.

## **Interchangeable Feet**

The 8.5 Foot Heavy Duty Steel Barricade is available in two different feet options: Bridge Feet or Flat Feet. Bridge Feet are typically used on uneven surfaces such as grass, gravel and slight hills or inclines; Flat Feet are ideal for flat surfaces such as concrete and are designed to minimize tripping hazards. To create a more permanent fixture, the Flat Feet can also be bolted to the ground.

## Product Benefits

- Long-lasting, hot-dipped galvanized finish
- Long length and heavy build for maximum protection
- Interchangeable feet options
- Easy interlocking design; compatible with other barricades
- Compatible with other barricades
- 100% recyclable

## Use Cases

- Large Construction Sites
- Traffic Management
- Stadiums
- Public Events

## Options & Accessories

### Custom Jacket Covers

Made of heavy-duty vinyl, these custom printed jacket covers fit perfectly over the frame of the barricade and offer a variety of colors, styles, fonts and imagery for individual branding needs. All

## **Barricade Storage Carts**

Easily transport and store barricades with a barricade storage cart. Each cart fits up to 30 8.5 foot barricades, stores up to 24 fixed foot barricades. Storage carts are made from powder-coated steel and can be stored indoors or outdoors.

## **Technical Specifications**

<b>Height</b>	44"
<b>Length</b>	8'6"
<b>Width</b>	26 3/4" (bridge feet); 26" (flat feet)

### Steel Crowd Control

Heavy Duty Steel, easy to get the feet on, interlock well. I would highly recommend these functional barriers.
