It is my concern that all water, run-off, parking lot contaminants, etc. be retained on the Duratec property. I currently have a storage facility on my property at 3316 Commerce St. This building is approximately 6-8 ft. below the street level and is at a low point on my property. It has been there and used before I acquired the property in 1992. I use and need this facility. Drainage is always a crucial part of development and I don't want to see my property compromised.
