Brian Hein
Assistant Superintendent-WWTP
City of La Crosse Utilities

La Crosse, WI 54601

Dear Brian:

The SEH Team is pleased to submit the following proposal of professional engineering services for the **Pammel Creek Sanitary Station Controls Upgrade Project** and **Hager Sanitary Station Pump Addition Project**.

We have reviewed the general scope of services from your request on February 10, 2021. A field review of both projects was completed on February 23rd. Both projects will require a multidiscipline engineering team that will complete the design and specifications documentation, WDNR permits, and cost estimates: Our proposal is organized as listed below:

1. Project Team
2. Agreement of Professional Services
 - a. Scope of services, schedule & payment
3. Attachment A – Level of Effort (A&E title, hours, costs)
4. Attachment B – Standard Terms and Conditions; Negotiated as of 6.21.19

SEH Project Team:

- Randy Sanford, PE – City of La Crosse Client Manager
- Jerimiah Wendt, PE – Project Manager | Senior Waste Water Engineer
- Rick Boya – PowrTek Engineering- Senior Electrical Engineer | Controls Engineer

Our team has reviewed both projects thoroughly and can off the City of La Crosse Utilities the following overview to both proposals.

Pammel Creek Sanitary Station Controls

The scope of this project was to completely replace and upgrade the controls within this building. Upon completing our field review we believe there is additional work based on some grey areas around WDNR code review items. We spoke with a WDNR reviewer, about this type of controls improvements project specifically. If a utility is changing the means of level measurement (in this case from bubbler to submersible pressure transducer), the department will consider it a reviewable project. There for additional WDNR code review, plan and specification review coordination and approvals have been added to the scope. Our PM will engage, coordinate, and address code review issues with WDNR throughout the entire project. Below is our Pricing:

Task Description	LOE	Engineering Fees
Task 1 Preliminary Design-PM, Process Design, WDNR Reviewable Plans	114	\$16,209
Task 2 Final Design	112	\$28,049
Task 3 Bidding	12	\$1,702
Total	238	\$45,960

Hagar Sanitary Station Pump Addition Project.

The scope of this project was to add a new submersible pump with the associated floor modification. Include an analysis, pump install, piping, and new controls as needed to tie into the existing controls and SCADA system. During our filed review our team noticed that the wet well is not segregated from the main level, which means that the entire building should be classified as a Class 1 Division 1 Hazardous location. It currently is not. Therefore, we have made some assumptions within our proposal. Our design approach assumes that a dividing wall can be added to the station to create a non-classified space for the electrical components. If during design, it is found that the dividing wall is impractical, or if additional replacement or relocation of electrical components is required meet WDNR code, the associated design will need to be re-scoped with you and considered an additional service at that time. This project is also considered a reviewable by WDNR and will be required to meet NR code reviews including approvable plans and specifications.

Our PM will engage, coordinate, and address code review issues with WDNR throughout the entire project. Below is our Pricing:

Task Description	LOE	Engineering Fees
Task 1 Preliminary Design-PM, Process Design, WDNR Reviewable Plans	132	\$17,767
Task 2 Final Design	118	\$30,404
Task 3 Bidding	20	\$2,668
Total	270	\$50,839

Lastly, our team believes there is an efficiency of effort and cost if the City of La Crosse were to hire SEH for both projects. Our site visits, drafting and plan preparation would be included within those efficiencies, offering the City of La Crosse a deduct of \$6,000 for a total project cost of \$90,799 for both projects to run concurrently and bid together. We also believe you will gain additional savings during the construction phase by having a larger project with more aggressive bidders to complete the wastewater lift station improvements.

We look forward to your review of these documents and continuing our trusted relationship with the City of La Crosse. If you have any other questions or need additional information, please contact me at 608.518.3679 or rsanford@sehinc.com

Sincerely,

Randy Sanford, PE (WI)

5. **CHANGE OF SCOPE.** The scope of service set forth in this Agreement is based on facts known at the time of the execution of this Agreement. The scope of service may not be fully definable during initial phases, and as the project progresses, facts discovered may indicate that the scope must be redefined. agreement shall not be applicable to any liability to the extent caused by La Crosse, its elected and appointed officials, officers, employees or authorized representatives, consultants, contractors or volunteers in the performance of this Agreement. Nothing in this Agreement is intended or shall be construed to be a waiver or estoppel of La Crosse or its insurer (or otherwise affect or alter their ability) to rely upon the limitations, defenses and immunities contained within Wis. Stat. §§ 345.05 and 893.80, or other applicable law. To the extent that indemnification is available and enforceable against La Crosse, (a) La Crosse or its insurer shall not be liable in indemnity, contribution, or otherwise for an amount greater than the limits of liability of municipal claims established by applicable Wisconsin or federal law; and (b) La Crosse's obligations under this Agreement are further conditioned upon the following: (i) the indemnified party shall promptly notify La Crosse in writing of any such claims, demands, liabilities, damages, costs and expenses within ten (10) days of discovery; (ii) La Crosse shall have sole control of, and the indemnified party shall reasonably cooperate in all respects, in the defense of the claims, demands, liabilities, damages, costs and expenses and all related settlement negotiations; and (iii) the indemnified party shall not make any admission or disclosure or otherwise take any action prejudicial to La Crosse except as required by law.

Neither party shall be liable for indirect, special, exemplary, consequential or incidental damages, including, without limitation, any damages for lost profits, revenue or business interruption. The parties represent that, as of the effective date, neither party has any notice or knowledge of any claims, demands, liabilities, damages, costs and expenses asserted or threatened by any third party with respect to the matters contemplated in this Agreement.

This indemnity provision shall survive the termination or expiration of this Agreement.

15. **NO PERSONAL LIABILITY.** Under no circumstances shall any trustee, officer, official, commissioner, director, member, partner or employee of either party have any personal liability arising out of this Agreement, unless an employee of the Contracting Party shall commit a criminal, fraudulent, malicious, or dishonest act which is excluded from Contracting Party's insurance coverage.

16. Intentionally omitted.

17. **INDEPENDENT CONTRACTORS.** The parties, their employees, agents, volunteers, and representative shall be deemed independent contractors of each other and shall in no way be deemed as a result of this Agreement to be employees of the other. The parties, their employees, agents, volunteers, and representatives are not entitled to any of the benefits that the other provides for its

employees. The parties shall not be considered joint agents, joint venturers, or partners.

Scope: The Basic Services to be provided by Consultant as set forth herein are provided subject to the attached Standard Terms and Conditions (Service Contracts)(SEH 06.21.19), which is incorporated by reference herein and subject to Exhibits attached to this Agreement. See Exhibit 1 for Level Of Effort (LOE). See Exhibit 2 Standard Terms and Conditions.

We understand that the City of La Crosse is requesting design services for the addition of a submersible pump and associated improvements at the New Hagar Sanitary Station, including the following items:

- Design of submersible pump to meet future flow requirements (Design flows to be provided by the City)
- Connection of proposed submersible pump to existing pipe system
- Controls and SCADA additions and modifications necessary for operation of proposed submersible pump
- Structural analysis and design of floor opening to allow for installation and retrieval of proposed submersible pump.
- Replacement of existing submersible pressure transducer
- Replacement of backup float system
- Replacement of generator and automatic transfer switch, including fuel piping, exhaust, insulation and louvers as needed
- Replacement of exhaust fans
- Replacement of electric unit heaters with natural gas unit heaters
- Patching, painting and touch up as needed.

Based on our review of the information provided by the City and our visit to the site, the following project approach and assumptions are proposed to complete the design and bidding for the above project:

Task I Preliminary Design:

1. Kickoff meeting with City staff and SEH team to discuss:
 - a. Deficiencies with existing vertical turbine pump, including pump-down test if possible
 - b. Location and orientation of possible dividing wall (see item 5 below)
 - c. Controls and electrical components standards/preferences
 - d. Reuse of existing components
 - e. Location and contacts for proposed gas service

- f. Configuration/location of cabinets and generator
- g. Interim and long-term SCADA communication details
- h. Construction sequencing/bypass needs
- 2. Development of Demolition Plans
- 3. Generator Sizing and Selection
 - a. Electrical Design
 - b. Structural Analysis based on proposed generator size, weight, location
- 4. HVAC Design
 - a. Replacement of exhaust fans and unit heater (with natural gas), to meet current code requirements.
 - b. Electrical integration of HVAC components
- 5. Electrical Design
 - a. Based on our review of the existing facility, the wet well is not segregated from the main level, which means that the entire building should be classified as a Class 1 Division 1 Hazardous location. Under this classification, all electrical components would need to be rated as explosion-proof, which is not considered feasible for the existing motor, motor control center, and other control components currently located in this area. Our design approach assumes that a dividing wall can be added to the station to create a non-classified space for the electrical components. If during design, it is found that the dividing wall is impractical, or if additional replacement or relocation of electrical components is required in order to meet code requirements, the associated design will be considered an additional service
 - b. Development of existing and proposed one-line diagrams
- 6. Structural Design
 - a. The proposed structural design components include the analysis of the existing floor slab to support a new generator, analysis and design of a new or revised floor opening to accommodate installation and retrieval of a submersible pump, and design of a masonry dividing wall. If additional structural modifications are required, the associated design will be considered an additional service.
- 7. Controls/Integration Design
- 8. Development of Proposed Plans
- 9. Development of Opinion of Probable Cost
- 10. Regulatory Submittal
 - a. Because a new pump and associated controls are being added to the station (even though the design flow and structure remain unchanged), the modifications will be considered a reviewable project by the Wisconsin Department of Natural Resources (WDNR). As such, submittal of plans, specifications and associated forms/checklists will be required
 - b. DNR submittal plans will also be submitted to City staff for review and comment

Task II Final Design

- 1. Address comments from WDNR, and incorporate necessary changes into plans and specifications
- 2. Incorporate changes into plans and specifications based on City feedback
- 3. Address any plan/specification changes based on City and WDNR review into a revised Opinion of Probable Cost
- 4. Resubmit plans to City to be used for City Bidding Requirements

Task III Bidding

- 1. SEH will assist the City in bidding the 100% complete plans, specifications and estimates. The City of La Crosse will provide its own front-end contractual documentation while SEH's technical plans, specifications and estimates will provide the detail. Our services include the preparation of technical bidding documents, answering contractor questions, preparation of all addendums for city staff, review of all bidding information, and provision of bid award recommendation.

Schedule: The following tentative schedule is proposed for completion of the tasks above:

Description

Kickoff Meeting/Site Visit	April 2021
DNR Submittal	June 2021
End of DNR 90-day Review Period	September 2021
Final Plans, Specifications and Opinion of Probable Cost to City	October 2021

This Agreement for Professional Services, attached Standard Terms and Conditions (Service Contracts)(SEH 06.21.19), Exhibits and any Attachments (collectively referred to as the "Agreement") supersedes all prior contemporaneous oral or written agreements and represents the entire understanding between Client and Consultant with respect to the services to be provided by Consultant hereunder. In the event of a conflict between the documents the Agreement for Professional Services and the Standard Terms and Conditions (Service Contracts)(SEH 06.21.19)(including scope, schedule, fee and signatures) shall take precedence over attached Exhibits. This Agreement may not be amended except by written agreement signed by the authorized representatives of each party.

Other Terms and Conditions: Other or additional terms contrary to the General Conditions that apply solely to this project as specifically agreed to by signature of the Parties and set forth herein: None.
