Introduction/Overview

The City of La Crosse is pleased to submit the 2024-2028 Capital Improvement Plan (CIP) to the citizens of La Crosse and the City Council Members. The Plan is a 5-year plan, adopted by the City of La Crosse, detailing the capital outlays over the next 5 years that will serve and enrich the lives of City residents in line with the City's core values and mission. The CIP represents the City's plan for development and is intended to balance the City's capital needs with its fiscal responsibility and financial limitations. The five-year plan is reviewed on an annual basis to adjust for changing needs/priorities of the community and changing framework of ongoing projects.

CIP Appropriations

The first year in the Capital Improvement Plan is the year that actual appropriations are authorized by the Common Council. The remaining four years are guides for future development of City infrastructure.

Capital Improvement Plan Policies

The Capital Improvement Budget includes both Capital Equipment and Capital Projects. A Capital Project is defined in the municipal code as a project that is expected to have a useful life of over one year and provide a minimum asset value over \$20,000. Capital Equipment is an outlay for equipment that is expected to have a useful life of over one year and provide a minimum asset value over \$10,000.

The City will prepare and adopt a 5-year Capital Improvement Plan (CIP) to systematically identify, plan, schedule, finance, track, and monitor capital projects to ensure cost effectiveness as well as conformance to established policies.

New projects and equipment that require annual operating and maintenance costs must be added to the appropriate department's annual operating budget.

Any unanticipated projects and equipment not previously listed in the capital budget requiring immediate funding from the Capital Budget will require a two-thirds vote by the Common Council members present at the time of adoption to be included.

Project implementation shall be the responsibility of the Board of Public Works. The Board of Public Works will ensure that all projects enumerated and funded in the adopted annual Capital Improvement Budget are designed, bid, purchased, and constructed.

CIP Planning Structure

Capital project and equipment requests are submitted to the Finance Dept by each Department in the City. The CIP consists of two separate documents: A Capital Project Budget and a Capital Equipment Budget. There are two main committees that oversee the planning of the CIP. The Board of Public Works reviews and approves the Capital Equipment requests. The review and approval of the Capital Projects is the responsibility of the City Planning Commission. These respective boards approve the recommended budgets for ultimate approval by the Common Council.

Capital Budget Process Timeline

Tax Incremental Financing (TIF)

Tax Incremental Financing (TIF) generates tax revenue that can be used to fund infrastructure investment and other eligible projects that will facilitate private development. When a Tax Increment District (TID) is created, the current value of all the taxable property within the defined boundaries is established. This value is the “base value” of the TID. The taxes collected on this portion of the property value are shared by the overlying taxing jurisdictions, and once the TID is created this portion of the tax collections is allocated as it was at the creation of the TID. (See Figure 1)

Over the life of the TID, the county, school district, technical college and municipality collect taxes generated from the TID base value. Meanwhile, new construction and investment increase the value of the district. All of the taxes collected on the growth in value of the district (or the "value increment") are turned over to the City as "tax increment" revenue. The City uses this revenue stream to pay for improvements that it made within the district which were in the approved project plan.

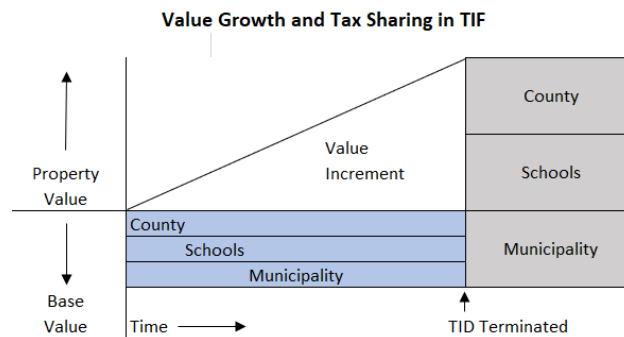

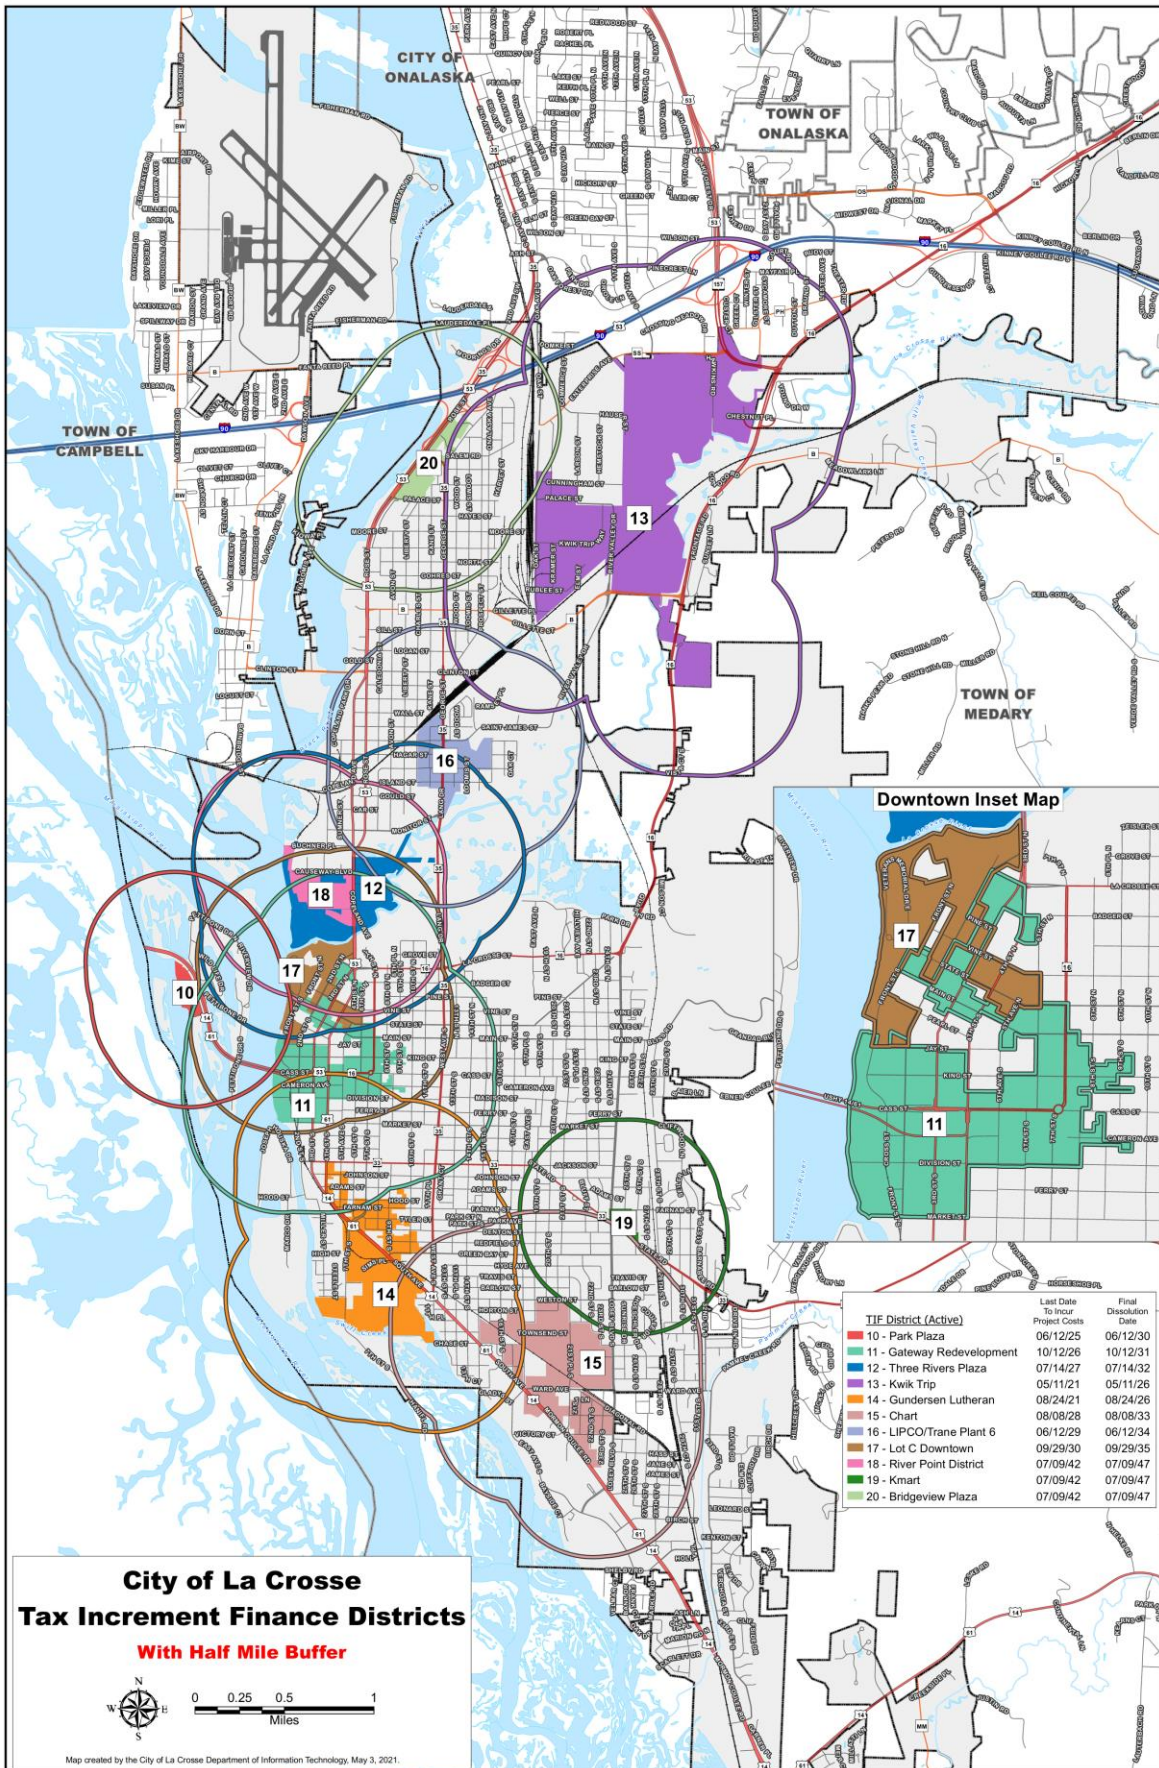

Figure 1

At the end of the maximum life period, or as soon as tax increments are collected in excess of total approved project costs, the TID is terminated. The entire value of the property that was in the TID is returned to the tax rolls of the overlying taxing jurisdictions. While the TID exists, the tax collections for each overlying jurisdiction are limited to the base value of the TID parcels. After termination of the TID, all of the overlying taxing jurisdictions share in a much larger tax base. Ideally this means that rates can be lowered to generate the same amount of revenue for the jurisdiction.

City of La Crosse Tax Incremental Districts

	Expenditure Period Deadline	TID Closure Date
TID 10 - Park Plaza	6/24/2025	6/12/2030
TID 11 - Gateway Redevelopment	10/12/2026	10/12/2031

Leased Vehicles

The City is in partnership with Enterprise Fleet Management. The City is transitioning fleet vehicles to leased vehicles to ultimately reduce the fleet budget and to update the current aging fleet. This report details the planned amount of vehicles the City will lease from Enterprise and the annual cost for 2024. The total annual lease cost includes any cash outlay for upfitting of vehicles and is net of any trade-in sales from the replaced vehicle. A negative annual lease cost signifies that the trade in sales were more than the total annual lease cost. Lease payments for general government are not included in the individual department operating budgets. The lease payments are levied for and are in the debt service fund. Enterprise and Special Revenue Fund leases are budgeted for in their respective fund operating budget.
