

**Re: Funding to complete the Marsh lead and PAH Contamination Analysis and Remediation Options**

The *Friends of the La Crosse River Marsh* endorse the proposal providing funding to complete the Remedial Actions Options Report on lead and PAH contamination in the marsh and Myrick Park.

There are many important questions regarding lead remediation options, waste disposal, and cost that need to be address through completion of the RAOR. Indeed, there are significant remedial action options here that have not been analyzed to date. Finding the best option, for the marsh, the park, and the community, is paramount if we are to adequately respond to this long-standing problem.

The *Friends* urge your committee to make funding available to move this analysis of options along.

Chuck Lee, President  
*Friends of the La Crosse River Marsh*
