I am asking you to Please approve the Request To have the Alley behind my home paved.

I have lived in my home next to the unpaved alley for over 40 yrs. I hope that the alley finally gets paved. I need to place my trash + recycle containers in the alley + I feel that having a paved, even surface would be much safer for me to travel on than the uneven surface it is now. There are many potholes + divots which would be easy for me to step in + injure myself. I have also watched my elderly neighbor attempt to fill these potholes with dirt, only to have it last for a short time + then have to do it again. I also believe paving the alley would attract new homeowners.

Please consider the Request to Pave This alley.

Sincerely,
Joan Price

To Whom it may Concern,

I am writing this letter to ask that you approve the request to pave the alley that sits behind my house.

My garage faces the alley & as it is now, some of the sand & rocks that serve as the alley is blown or carried into the garage where my vehicles & other valued items are stored. I believe that a paved alley would substantially cut down on debris that might be carried into the garage, which could possibly damage items there. I also believe that with a paved alley, the property value of my home would increase. Although there is cost involved, I would be willing to make that investment. In the long run, I believe ~~a~~ a paved alleyway would prevent more wear & tear on vehicles I own as there are many ruts & potholes that develop.

I hope you will read this & approve the paving of the alley.

Thank you for your consideration.
