

To Whom it May Concern:

I am pleased to submit this letter of support for Hatchery LLC's accepted proposal to repurpose the historic Riverside Park fish control laboratory building.

I understand that Hatchery LLC plans to turn the main building into a rentable multi-use community space similar to renting a park pavilion within the city. I believe creating a centralized place where the community can gather and grow is CRUCIAL to a prosperous community, thriving downtown and a vibrant park system.

I also support returning the 2nd floor of the fish lab building into short term housing, as it once was in the mid 1920's. A short term rental is a creative and fun way to bring this space back to its roots while still adhering to strict historic limitations placed on this space.

Finally, replacing the crumbling parking lot to the east of the building with an international garden themed patio is something EVERYONE can enjoy. Providing a place for people to relax and socialize while sharing a beverage or snack from local vendors is a great addition to Riverside Park. This is NOT 3rd street in the park, this is a patio full of greenery, serenity, laughs, smiles, and social interaction.

The sheer thoughtfulness and passion Tiffany and Marty of Hatchery LLC have for this community is second to none. I am confident that their plans for Riverside Park fish control laboratory building show a commitment to the area that will become a lasting park asset. I support this and ask that you vote in favor of their plan.

Additional comments:

As a business owner of La Crosse for three decades I support any new businesses that brings employment opportunities and growth to our city. This restoration fits with overall park beautification.

Sincerely,
