Subject: sewer collapse

Matt/Randy,

Karen brought Chad Viner up to me to discuss a sewer lateral collapse on Johnson, 1300 block today because everyone with authority in engineering was gone. This pavement is less than 5 years old.

I said he could go ahead and get a permit to open the street to do the repairs under the emergency declaration section of the code (I couldn't see making the home uninhabitable for over 2 weeks just because we don't have any BPW scheduled) and that you will need to bring the permit to the Board on the 7th for direction on surface repairs required.

Bernie

- **Sec. 40-36. - Emergency excavations authorized.**

In the event of an emergency, any person owning or controlling any sewer, water main, conduit or utility in or under any street and his agents or employees may take immediate proper emergency measures to remedy dangerous conditions for the protection of property, life, health, or safety without obtaining an excavation permit; provided that such person shall apply for an excavation permit not later than the end of the next succeeding business day and shall not make any permanent repairs without first obtaining an excavation permit hereunder. The Board of Public Works may require additional street surfacing removal and replacement for streets less than five years old and streets paved with Portland cement concrete.

"The ultimate measure of a man is not where he stands in moments of comfort and convenience, but where he stands at times of challenge and controversy,"² Dr. Martin Luther King
