Subject: Update on WWTP Odor Control Improvements and Next Steps

Dear Mayor Reynolds,

I am writing to provide an update on the ongoing efforts to address concerns about odors emanating from the Wastewater Treatment Plant (WWTP) in the City of La Crosse, following our meeting on February 3rd.

City Brewery fully understands the significance of this issue and appreciates your commitment to improving the quality of life for the residents of La Crosse. We acknowledge the need to effectively manage and control the hydrogen sulfide (H₂S) emissions from the WWTP.

In 2024, significant progress was made, including multiple improvements to manage and reduce H₂S discharge. These efforts have enabled the plant to meet the new H₂S discharge limits established in October 2024. Currently, the plant is operating under good control, and we continue to monitor its performance closely.

There is one remaining item for the WWTP that City Brewery is committed to addressing in 2025. The reactor cover has reached the end of its useful life, and we are in the process of planning for its replacement. This will be a crucial step toward further enhancing odor control measures at the plant. We are dedicated to completing this work in a timely manner and will remain focused on maintaining the plant's positive environmental impact on the community.

Please don't hesitate to reach out if you have any questions or need further information. We look forward to working collaboratively to ensure the continued success of this project.

Sincerely,

Matthew Sweet

 No

What is the purpose of this expenditure?
 Scheduled Replacement, Replace worn-out equipment, Increased Safety

Has request been reviewed by the Purchasing Buyer?

Total Funding
\$115,500
 New Borrowing: \$115,500

Quantity: 20 (Unit Cost: \$5,775.00)

Replacement of copier/printer/scanners citywide. Each department's needs will be evaluated to ensure the proper equipment is chosen.

New/Used: New
Replacement/Addition: Replacement
Asset being Replaced: Canon copiers
Condition of Asset being Replaced:
Odometer Reading/Hours:
Standard Replacement Cycle:
Estimated Life of Equipment: 0

Justification: Approval & Oversight:

What is the request's desired outcome?

Has request been approved by an oversight board?

No

What is the purpose of this expenditure?

Scheduled Replacement, Present Equipment obsolete, Replace worn-out equipment

Has request been reviewed by the Purchasing Buyer?

No

What is the justification of this request?

Replace equipment at end of life cycle and support. Additional service calls have been necessary to keep current machines in service. Breakdowns are resulting in decreased staff efficiency. This equipment was last replaced in 2020.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	Low	Near end of manufacturer product support
Safety	Low	
Payback Period	Low	New machines are more efficient, but not enough to justify a payback period
Sustainability <i>(effect on environment)</i>	Low	New machines are more energy efficient
Cost to Operate/Maintain <i>(effect on Operating Budget)</i>	Medium	Older machines require more service calls. The support cost increases as the copier ages due to more frequent trips, more expensive repair parts, and more worn out parts to replace.
Revenue Generation	Not Applicable

What is the justification of this request?
 Response equipment is used in hazardous environments and many of the rubber/plastic products have a very limited life span. Hazmat air monitoring equipment have built in consumables such as meter sensors, filters, and pumps.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Some equipment is recommended by national standards to be replaced after first-time use in rescue operations to maintain safety for employees and those rescued. Often it is rotated after emergency use into training equipment to extend usable equipment life. Hazmat meters must be maintained with calibration gas, sensor replacement, and mandated consistent maintenance.
Safety	High	Used/worn equipment items that are not replaced are less safe to use in emergency situations.
Payback Period	Low	N/A
Sustainability <i>(effect on environment)</i>	Medium	Hazardous materials response equipment enables us to better protect the environment.

E97 Training Site - Equipment Improvements and Live Burn Engineering Requirements

(No Funding in 2026)

Total Funding
\$50,000
 New Borrowing: \$50,000

Training Site live burn facility evaluation and repairs needed to safely continue firefighter training and skill development.

New/Used: New
 Replacement/Addition: Addition
 Asset being Replaced:
 Condition of Asset being Replaced:
 Odometer Reading/Hours:
 Standard Replacement Cycle:
 Estimated Life of Equipment: 0

Justification: Approval & Oversight:

What is the request's desired outcome?
 Provides safer training simulation opportunities for department personnel. Ability to generate revenue by charging for site use to other jurisdictions, public utility groups, and technical college system. Trench and confined space props would also be available to other City departments for required training.
 Will complete a required structural engineering analysis of live burn facilities, to include repairs of live burn facility.

Has request been approved by an oversight board?
 No
Has request been reviewed by the Purchasing Buyer?
 No

What is the purpose of this expenditure?
 Present Equipment obsolete, Replace worn-out equipment, Reduce personnel time, Expand service, New Operation, Increased Safety, Improve procedures, records, etc...

What is the justification of this request?
 Current training props are either non-existent, not adequate and/or extremely old and becoming unsafe. New training props will expand emergency response capabilities and provide more realistic training, and ultimately safer emergency responders.

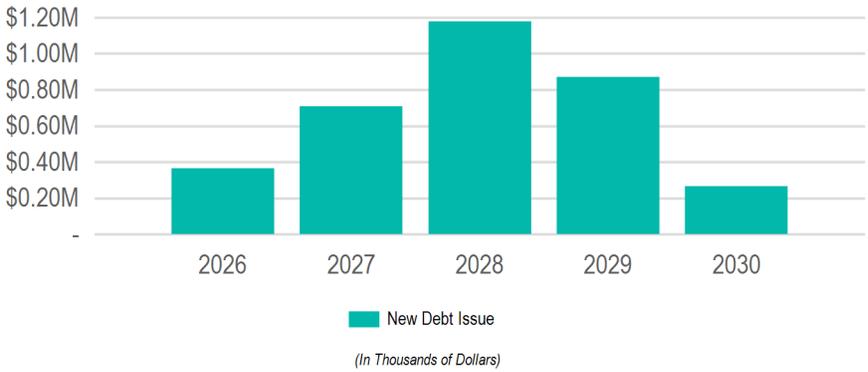

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Live burn facility has required structural engineering inspections every five years. Repairs and upgrades are a standard outcome, due to the abuse this structure takes under repeated live fire evolutions. Additional site training props and materials are outdated and in need of replacement. Will meet mandated standards required by OSHA and DSPS.
Safety	High	Continued training in fire and multiple technical rescue disciplines is extremely important and allows our personnel to learn in a safe training environment. This investment provides for a safer incident scene and reduced liability for the City. Training capacity will extend to other city departments with additional training requirements that can be met by these upgrades.
Payback Period	High	Payback is immediate, as safe employees experience fewer injuries and fewer worker's compensation claims. Successful outcomes on emergency scenes is the ultimate payback for community members.
Sustainability <i>(effect on environment)</i>	High	A proper functioning live burn facility and the addition of training props will afford a training environment that duplicates the natural structures and incidents to which we respond. These training props save the natural bluffs and lands that we would otherwise need to physically train on to master skills competency. The live burn facility also reduces the need for acquired structure fire training and eliminates the atmospheric hazards associated with burning old structures for training purposes.
Cost to Operate/Maintain <i>(effect on Operating Budget)</i>	Low	Equipment is low maintenance after initial installation. Engineering analysis and modifications are required every five years.
Revenue Generation	Low	Revenue source as used by outside agencies.

The IT Department implements a comprehensive lifecycle policy for managing end user technology equipment. This includes purchasing warranties for new equipment to cover the expected life of the item, recycling out of warranty equipment to other non-critical areas within the city, and auctioning off old equipment to offset the cost of purchasing new equipment. We are at the mercy of vendors such as Microsoft. Due to COVID, there was a significant increase in laptops. Laptops are due to be replaced 2 years sooner than desktops and laptops cost slightly more than twice as much as desktops.

These activities are not conducive to meeting the goals of the fleet replacement program as they drastically impact the resale values of the vehicles. The current heavy duty trucks will be ready for replacement at this time.

The city has a water consumption of 1.8 Ft per hour, one well produces .6 ft. per hour. We have one current portable generator and 3 stationary well generators. Two of those stationary generators power wells that are high in manganese and are each 30 years old needing replaced. To ensure in the event of emergency we can provide clean water to match the cities rate of consumption is highly important. This additional generator will give use the backup and the option to run our system normally regardless of circumstance.

 No

What is the purpose of this expenditure?
 Scheduled Replacement, Replace worn-out equipment, Increased Safety

Has request been reviewed by the Purchasing Buyer?

Justification: **Approval & Oversight:**

 No

What is the purpose of this expenditure?

Scheduled Replacement, Present Equipment obsolete, Replace worn-out equipment

Has request been reviewed by the Purchasing Buyer?
 No

What is the justification of this request?

Replace equipment at end of life cycle and support. Additional service calls have been necessary to keep current machines in service. Breakdowns are resulting in decreased staff efficiency. This equipment was last replaced in 2020.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	Low	Near end of manufacturer product support
Safety	Low	
Payback Period	Low	New machines are more efficient, but not enough to justify a payback period
Sustainability <i>(effect on environment)</i>	Low	New machines are more energy efficient
Cost to Operate/Maintain <i>(effect on Operating Budget)</i>	Medium	Older machines require more service calls. The support cost increases as the copier ages due to more frequent trips, more expensive repair parts, and more worn out parts to replace.
Revenue Generation	Not Applicable

 No

What is the purpose of this expenditure?
 Scheduled Replacement, Replace worn-out equipment, Increased Safety

Has request been reviewed by the Purchasing Buyer?
 No

What is the justification of this request?
 Response equipment is used in hazardous environments and many of the rubber/plastic products have a very limited life span. Hazmat air monitoring equipment have built in consumables such as meter sensors, filters, and pumps.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Some equipment is recommended by national standards to be replaced after first-time use in rescue operations to maintain safety for employees and those rescued. Often it is rotated after emergency use into training equipment to extend usable equipment life. Hazmat meters must be maintained with calibration gas, sensor replacement, and mandated consistent maintenance.
Safety	High	Used/worn equipment items that are not replaced are less safe to use in emergency situations.
Payback Period	Low	N/A
Sustainability <i>(effect on environment)</i>	Medium	Hazardous materials response equipment enables us to better protect the environment.

E97 Training Site - Equipment Improvements and Live Burn Engineering Requirements

(No Funding in 2026)

Total Funding
\$50,000
 New Borrowing: \$50,000

Training Site live burn facility evaluation and repairs needed to safely continue firefighter training and skill development.

New/Used: New
 Replacement/Addition: Addition
 Asset being Replaced:
 Condition of Asset being Replaced:
 Odometer Reading/Hours:
 Standard Replacement Cycle:
 Estimated Life of Equipment: 0

Justification: Approval & Oversight:

What is the request's desired outcome?
 Provides safer training simulation opportunities for department personnel. Ability to generate revenue by charging for site use to other jurisdictions, public utility groups, and technical college system. Trench and confined space props would also be available to other City departments for required training.
 Will complete a required structural engineering analysis of live burn facilities, to include repairs of live burn facility.

Has request been approved by an oversight board?
 No
Has request been reviewed by the Purchasing Buyer?
 No

What is the purpose of this expenditure?
 Present Equipment obsolete, Replace worn-out equipment, Reduce personnel time, Expand service, New Operation, Increased Safety, Improve procedures, records, etc...

What is the justification of this request?
 Current training props are either non-existent, not adequate and/or extremely old and becoming unsafe. New training props will expand emergency response capabilities and provide more realistic training, and ultimately safer emergency responders.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Live burn facility has required structural engineering inspections every five years. Repairs and upgrades are a standard outcome, due to the abuse this structure takes under repeated live fire evolutions. Additional site training props and materials are outdated and in need of replacement. Will meet mandated standards required by OSHA and DSPS.
Safety	High	Continued training in fire and multiple technical rescue disciplines is extremely important and allows our personnel to learn in a safe training environment. This investment provides for a safer incident scene and reduced liability for the City. Training capacity will extend to other city departments with additional training requirements that can be met by these upgrades.
Payback Period	High	Payback is immediate, as safe employees experience fewer injuries and fewer worker's compensation claims. Successful outcomes on emergency scenes is the ultimate payback for community members.
Sustainability <i>(effect on environment)</i>	High	A proper functioning live burn facility and the addition of training props will afford a training environment that duplicates the natural structures and incidents to which we respond. These training props save the natural bluffs and lands that we would otherwise need to physically train on to master skills competency. The live burn facility also reduces the need for acquired structure fire training and eliminates the atmospheric hazards associated with burning old structures for training purposes.
Cost to Operate/Maintain <i>(effect on Operating Budget)</i>	Low	Equipment is low maintenance after initial installation. Engineering analysis and modifications are required every five years.
Revenue Generation	Low	Revenue source as used by outside agencies.

The IT Department implements a comprehensive lifecycle policy for managing end user technology equipment. This includes purchasing warranties for new equipment to cover the expected life of the item, recycling out of warranty equipment to other non-critical areas within the city, and auctioning off old equipment to offset the cost of purchasing new equipment. We are at the mercy of vendors such as Microsoft. Due to COVID, there was a significant increase in laptops. Laptops are due to be replaced 2 years sooner than desktops and laptops cost slightly more than twice as much as desktops.

The city has a water consumption of 1.8 Ft per hour, one well produces .6 ft. per hour. We have one current portable generator and 3 stationary well generators. Two of those stationary generators power wells that are high in manganese and are each 30 years old needing replaced. To ensure in the event of emergency we can provide clean water to match the cities rate of consumption is highly important. This additional generator will give use the backup and the option to run our system normally regardless of circumstance.
