City Engineer

400 La Crosse Street

La Crosse, Wi 54601

We as residents of 125 16th Street South are in favor of the installation of concrete pavement from 16th to 17th Streets between King and Main Streets. The improvement will decrease the amount of dust, dirt, and mud tracked into our house, it will make the alley easier to plow in the winter, it will make the block look much cleaner and neater, and it will increase the value of our home. Though we will be unable to attend the public hearing on March 5, we wish to add our support to the project. Thank you very much.
