RE: **123 3rd Street South Sewer Separation**

On behalf of Borton Construction, I am pleased to submit my quote for the sewer separation work required for the 123 3rd Street Building. I have based my proposal on the following scope of work:

Project Scope Narrative

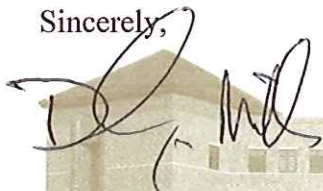

Description	Narrative
Site Utilities/ROW Work	Saw cut and remove pavement, curb and gutter, and sidewalks as necessary to allow for storm water piping installation Excavate to existing 12" storm sewer. Tap storm sewer. Install new 6" lateral to the 123 3 rd Street building. Backfill and compact. Patch asphalt, curb and gutter, sidewalk, and pavers. Traffic control. Permits.
Catch Basin/Interior Plumbing	Excavate for new catch basin in rear of the building Set new catch basin, ring, and grate. Demo existing drain. Extend new 6" storm line through the basement to the new 6" lateral. Reroute and reconnect existing sanitary piping as necessary. Includes permits.

Total Costs: \$31,103.00

Exclusions: Import of fill, compaction testing, polluted or hazardous soils.

Thank you for the opportunity to prepare this quote. Should you have any questions, please don't hesitate to call.

Sincerely,

Dan Miller – Project Manager
 Borton Construction, Inc.
