Dear Council Members,

I urge you to pass Resolution #22-097 - Resolution declaring a climate emergency, committing to policies that reduce greenhouse gas (GHG) emissions and accelerating the clean energy transition, and supporting intergovernmental cooperation to reduced GHG emissions.

Words and resolutions matter. They give the framework within which we work to take the actions needed to address the climate emergency which is upon us. Recently I learned of the U.S. Climate Alliance(<https://www.usclimatealliance.org/>) : a bipartisan coalition of 24 governors working together to achieve the goals of the Paris Agreement and keep temperature increases below 1.5 degrees Celsius. Our state is among its members. It is inspiring to see what is being done at State, City and Local levels across this country.

La Crosse is a leader in many ways, and we need to step up our game, do our part, and work for the needed clean energy transition required if we are to have any hope of a livable planet.

Thank you

Beth Moore

La Crosse, WI

. Recent events--floods, droughts, fires, melting glaciers--show that we have to act now to stop greenhouse gas emissions. This resolution will reiterate our pledge to take action and prepare the way for the city's climate action plan coming later this year. It will show that we are serious about addressing this existential threat. It will connect us to the millions of people who are working to declare a global climate emergency. Recent events--floods, droughts, fires, melting glaciers--show that we have to act now to stop greenhouse gas emissions.
