 Continue to meet response safety goals by providing safe equipment for the three Special Operations Teams

What is the purpose of this expenditure?
 Present Equipment Obsolete, Scheduled Replacement, Replace worn-out equipment, Increased Safety

What is the justification of this request?
 Response equipment is used in hazardous environments and many of the rubber/plastic products have a very limited life span. Hazmat air monitoring equipment have built in consumables such as meter sensors, filters, and pumps. Water team needs include replacement of ropes, swift water suits, cold water suits, and misc. response equipment or consumables.

Has request been approved by an oversight board?
 No

Has request been reviewed by the Purchasing Buyer?
 No

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Some equipment is recommended by national standards to be replaced after first-time use in rescue operations to maintain safety for employees and those rescued. Often it is rotated after emergency use into training equipment to extend usable equipment life. Hazmat meters must be maintained with calibration gas, sensor replacement, and mandated consistent maintenance.
Safety	High	Used/worn equipment items that are not replaced are less safe to use in emergency situations.
Payback Period	Low	
Sustainability <i>(effect on environment)</i>	Medium	Hazardous materials response equipment enables us to better protect the environment.
Cost to Operate/Maintain <i>(effect on Operating Budget)</i>	Low

E26097 Training Site - Equipment Improvements and Live Burn Engineering Requirements

(No Funding in 2027)

Total Funding
\$50,000
 New Borrowing: \$50,000

Training Site live burn facility evaluation and repairs needed to safely continue firefighter training and skill development.

New/Used: New
 Replacement/Addition: Replacement
 Asset being Replaced: Drill Tower
 Condition of Asset being Replaced: Build in 1975
 Odometer Reading/Hours: 0
 Standard Replacement Cycle:
 Estimated Life of Equipment: 25

Justification: **Approval & Oversight:**

What is the request's desired outcome?
 Provides safer training simulation opportunities for department personnel. Ability to generate revenue by charging for site use to other jurisdictions, public utility groups, and technical college system. Trench and confined space props would also be available to other City departments for required training. Will complete a required structural engineering analysis of live burn facilities, to include repairs of live burn facility.

Has request been approved by an oversight board?
 No
Has request been reviewed by the Purchasing Buyer?
 No

What is the purpose of this expenditure?
 Scheduled Replacement, Present Equipment Obsolete, Improve procedures, records, etc..., Replace worn-out equipment, Reduce personnel time, Increased Safety

What is the justification of this request?
 Current training props are either non-existent, not adequate and/or extremely old and becoming unsafe. New training props will expand emergency response capabilities and provide more realistic training, and ultimately safer emergency responders.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Live burn facility has required structural engineering inspections every five years. Repairs and upgrades are a standard outcome; due to the abuse this structure takes under repeated live fire evolutions. Additional site training props and materials are outdated and in need of replacement. Will meet mandated standards required by OSHA and DSPS.
Safety	High	Continued training in fire and multiple technical rescue disciplines is extremely important and allows our personnel to learn in a safe training environment. This investment provides for a safer incident scene and reduced liability for the City. Training capacity will extend to other city departments with additional training requirements that can be met by these upgrades.
Payback Period	High	Payback is immediate, as safe employees experience fewer injuries and fewer worker's compensation claims. Successful outcomes on emergency scenes are the ultimate payback for community members.
Sustainability <i>(effect on environment)</i>	High	A proper functioning live burn facility and the addition of training props will afford a training environment that duplicates the natural structures and incidents to which we respond. These training props save the natural bluffs and lands that we would otherwise need to physically train on to master skills competency. the live burn facility also reduces the need for acquired structure fire training and eliminates the atmospheric hazards associated with burning old structures for training purposes.
Cost to Operate/Maintain <i>(effect on Operating Budget)</i>	Low	Equipment is low maintenance after initial installation. Engineering analysis and modifications are required every five years.
Revenue Generation	High	Revenue source as used by outside agencies.

The IT Department implements a comprehensive lifecycle policy for managing end user technology equipment. This includes purchasing warranties for new equipment to cover the expected life of the item, recycling out of warranty equipment to other non-critical areas within the city, and auctioning off old equipment to offset the cost of purchasing new equipment. We are at the mercy of vendors such as Microsoft. Due to COVID, there was a significant increase in laptops. Laptops are due to be replaced 2 years sooner than desktops and laptops cost slightly more than twice as much as desktops.

The city has a water consumption of 1.8 Ft per hour, one well produces .6 ft. per hour. We have one current portable generator and 3 stationary well generators. Two of those stationary generators power wells that are high in manganese and are each 30 years old needing replaced. To ensure in the event of emergency we can provide clean water to match the cities rate of consumption is highly important. This additional generator will give use the backup and the option to run our system normally regardless of circumstance.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Some equipment is recommended by national standards to be replaced after first-time use in rescue operations to maintain safety for employees and those rescued. Often it is rotated after emergency use into training equipment to extend usable equipment life. Hazmat meters must be maintained with calibration gas, sensor replacement, and mandated consistent maintenance.
Safety	High	Used/worn equipment items that are not replaced are less safe to use in emergency situations.
Payback Period	Low	
Sustainability <i>(effect on environment)</i>	Medium	Hazardous materials response equipment enables us to better protect the environment.

E26097 Training Site - Equipment Improvements and Live Burn Engineering Requirements

(No Funding in 2027)

Total Funding
\$50,000
New Borrowing: \$50,000

Training Site live burn facility evaluation and repairs needed to safely continue firefighter training and skill development.

New/Used: New
Replacement/Addition: Replacement
Asset being Replaced: Drill Tower
Condition of Asset being Replaced: Build in 1975
Odometer Reading/Hours: 0
Standard Replacement Cycle:
Estimated Life of Equipment: 25

Justification: **Approval & Oversight:**

What is the request's desired outcome?
Provides safer training simulation opportunities for department personnel. Ability to generate revenue by charging for site use to other jurisdictions, public utility groups, and technical college system. Trench and confined space props would also be available to other City departments for required training. Will complete a required structural engineering analysis of live burn facilities, to include repairs of live burn facility.

Has request been approved by an oversight board?
No
Has request been reviewed by the Purchasing Buyer?
No

What is the purpose of this expenditure?
Scheduled Replacement, Present Equipment Obsolete, Improve procedures, records, etc..., Replace worn-out equipment, Reduce personnel time, Increased Safety

What is the justification of this request?
Current training props are either non-existent, not adequate and/or extremely old and becoming unsafe. New training props will expand emergency response capabilities and provide more realistic training, and ultimately safer emergency responders.

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated <i>(Department replacement program/Federal/State/Grant/Other)</i>	High	Live burn facility has required structural engineering inspections every five years. Repairs and upgrades are a standard outcome; due to the abuse this structure takes under repeated live fire evolutions. Additional site training props and materials are outdated and in need of replacement. Will meet mandated standards required by OSHA and DSPS.
Safety	High	Continued training in fire and multiple technical rescue disciplines is extremely important and allows our personnel to learn in a safe training environment. This investment provides for a safer incident scene and reduced liability for the City. Training capacity will extend to other city departments with additional training requirements that can be met by these upgrades.
Payback Period	High	Payback is immediate, as safe employees experience fewer injuries and fewer worker's compensation claims. Successful outcomes on emergency scenes are the ultimate payback for community members.
Sustainability <i>(effect on environment)</i>	High	A proper functioning live burn facility and the addition of training props will afford a training environment that duplicates the natural structures and incidents to which we respond. These training props save the natural bluffs and lands that we would otherwise need to physically train on to master skills competency. the live burn facility also reduces the need for acquired structure fire training and eliminates the atmospheric hazards associated with burning old structures for training purposes.
Cost to Operate/Maintain <i>(effect on Operating Budget)</i>	Low	Equipment is low maintenance after initial installation. Engineering analysis and modifications are required every five years.
Revenue Generation	High	Revenue source as used by outside agencies.

The IT Department implements a comprehensive lifecycle policy for managing end user technology equipment. This includes purchasing warranties for new equipment to cover the expected life of the item, recycling out of warranty equipment to other non-critical areas within the city, and auctioning off old equipment to offset the cost of purchasing new equipment. We are at the mercy of vendors such as Microsoft. Due to COVID, there was a significant increase in laptops. Laptops are due to be replaced 2 years sooner than desktops and laptops cost slightly more than twice as much as desktops.

The city has a water consumption of 1.8 Ft per hour, one well produces .6 ft. per hour. We have one current portable generator and 3 stationary well generators. Two of those stationary generators power wells that are high in manganese and are each 30 years old needing replaced. To ensure in the event of emergency we can provide clean water to match the cities rate of consumption is highly important. This additional generator will give use the backup and the option to run our system normally regardless of circumstance.

Resolution authorizing the creation and uses of special revenue fund for the Street Department.

RESOLUTION

WHEREAS, the Street Department maintains a stockpile of dredge sand at the Municipal Service Center that requires staff labor, equipment, and time for storage, movement, and loading of sand; and

NOW, THEREFORE, BE IT RESOLVED by the Common Council of the City of La Crosse that it hereby authorizes immediate establishment of a special revenue fund, and correlating expense funds, for the Street Department.

Housing Incentive Fund

Purpose

The purpose of the Housing Grant Revolving Fund, now known as the “Housing Incentive Fund” and hereafter “The Fund”, is to make funding available for both affordable and market rate housing, including but not limited to missing middle housing. Since the approval of funds for this program in 2024, the City has begun to work toward implementation of the Forward La Crosse, The City of La Crosse 2040 Comprehensive Plan, the Housing Study, and the Consolidated Plan. The Fund serves as a key financing mechanism supporting the goals identified in these plans.

The Housing Study and the Comprehensive Plan identify the following three items as the main housing goals of the City:

- Increase the supply of owner and rental units affordable to households making less than the area median income
- Foster greater housing diversity through strategic infill development
- Create more housing opportunities attractive to La Crosse residents, especially households with children

The housing goals of the 2025-2029 Consolidated Plan are:

- Increase access to Affordable Quality Housing through
 - Homeowner housing added
 - Homeowner housing rehabilitation

Background

The Fund was approved in the 2024, 2025, and 2026 Capital Improvement Plans (CIP). Future contributions are being explored, particularly from sources that do not carry affordability requirements.

Funding

Through the CIP process, a total of \$2 million has been requested, with \$1.5 million approved through 2026.

Process

A Request for Proposals (RFP) will be issued to evaluate projects that align with the purpose of The Fund. All submissions will be reviewed by staff from the Planning and Development Department and presented to the Economic & Community Development Commission for approval. Policy and procedural updates will be reviewed by the Economic & Community Development Commission.

Memorandum of Understanding #8 Tri-State Ambulance Employee Leased Agreement Operational and Compensation Changes

Between the City of La Crosse (“City”) and the International Association of Firefighters (“IAFF”)

RE: Structural compensation of amended leased employee agreement with Tri-state Ambulance (TSA)

The City and IAFF have agreed that a recent amendment to the current Leased Employee Agreement(s) with TSA will create a change in working conditions that require structured compensation language. Duty day language is also necessary due to anticipated increased call and workload volume associated with a 24/7 transport operation.

2025 – 2027 CBA:
Article 14 Wages and Salary Schedule for Transport Ambulance

Bargaining unit members assigned to practice as a paramedic by the Chief, approved by the Medical Director, and work under the provisions of the Tri State Ambulance leased employee agreement, shall receive an additional (6) % of the base wage rate. Bargaining unit members assigned will be required to work a minimum of 48 hours per month if assigned to platoon shift, and 24 hours per month on average if assigned to day shift.

Bargaining unit members assigned to practice as an EMT by the Chief, approved by Medical Director, and work under the provisions of the leased employee agreement, shall receive an additional (1) % of the base wage rate. Bargaining unit members assigned will be required to work a minimum of 48 hours per month if assigned to platoon shift, and 24 hours per month on average if assigned to day shift.

Bargaining unit members assigned as EMT’s and Paramedics that reach 10 years cumulative service meeting the minimum hours per month, will have a reduced minimum of 24 hours per month average but will retain respective % of base wage.

Bargaining unit members assigned as EMT’s and Paramedics that reach 15 years of cumulative service meeting the minimum hours per month, will have no minimum service requirement and will continue to retain respective % of base wage.

Bargaining unit members that have been active in the Leased Employee Program established on April 20th, 2021, will have individual years of service in the program credited to cumulative years of service in this agreement.

Bargaining unit members active in the program will not be subject to the adopted duty day language while working on the ambulance, unless mandatory training is required for medical licensure and/or mandated by the Medical Director.

A ride stipend for EMT will be established at \$60.00 per 24-hour shift. \$30.00 for 12-hour shift.
A ride stipend for Paramedic will be established at \$80 per 24-hour shift. \$40.00 for 12-hour shift.

Bargaining unit members must work at least 4 hours to receive any stipend amount and only one stipend paid per day, for each of the respective 12- or 24-hour shifts should they be split.

A short notice order in activation for ordered or directed service on the ambulance for both EMT's and medics will be established at an additional \$60.00 per shift. This situation applies when bargaining unit members are given less than 24 hours' notice to work on the ambulance. This instance could potentially occur for both on duty and off duty personnel.

All Bargaining Unit members hired after January 1st, 2027, may be required as a condition of employment to work as a paramedic or EMT on an EMS transport unit.

2. Notwithstanding any other provision of the Agreement, Employing Entity’s Fire Chief shall schedule, in the Chief’s sole and absolute discretion, the number and combination of paramedics and EMTs on the ambulance rig but, at a minimum staffing level of one EMT and one paramedic unless mutually agreed upon by both parties. 4. Notwithstanding any other provision of this Agreement, in the event Employing Entity’s paramedics and EMTs who are providing services under the Agreement are considered available when Employing Entity responds to a working structure fire within the City of La Crosse, or within a municipality contracting for firefighting services from Employing Entity or requesting mutual aid from Employing Entity, then the Employing Entity’s available paramedics and EMTs will also respond and provide services during the structure fire.
5. This Amendment supersedes any contrary or inconsistent provisions of the Agreement. All terms and conditions of the Agreement continue in full force and effect unless expressly modified herein.
