Hello again Jay,

I want to start this next week. The previous home owner passed away and the sewer is collapsed. The new home owners and moving in and need it repaired. It will be a full relay with a sewer tap in the concrete street. I would plan that for a day and to backfill with heated sand if the weather is bad. I'll follow this up with a call to make sure I have my ducks in a row.

Thank you,  
Josh
