Justification:What is the request's desired outcome?

Provides safer training simulation opportunities for department personnel. Ability to generate revenue by charging for site use to other jurisdictions, public utility groups, and technical college system. Trench and confined space props would also be available to other City departments for required training. Will complete a required structural engineering analysis of live burn facilities, to include repairs of live burn facility.

What is the purpose of this expenditure?

Scheduled Replacement, Present Equipment Obsolete, Improve procedures, records, etc..., Replace worn-out equipment, Reduce personnel time, Increased Safety

What is the justification of this request?

Current training props are either non-existent, not adequate and/or extremely old and becoming unsafe. New training props will expand emergency response capabilities and provide more realistic training, and ultimately safer emergency responders.

Approval & Oversight:Has request been approved by an oversight board?

No

Has request been reviewed by the Purchasing Buyer?

No

Prioritization Matrix:

Category	Priority Rating	Explanation
Required/Mandated (Department replacement program/Federal/State/Grant/Other)	High	Live burn facility has required structural engineering inspections every five years. Repairs and upgrades are a standard outcome; due to the abuse this structure takes under repeated live fire evolutions. Additional site training props and materials are outdated and in need of replacement. Will meet mandated standards required by OSHA and DSPS.
Safety	High	Continued training in fire and multiple technical rescue disciplines is extremely important and allows our personnel to learn in a safe training environment. This investment provides for a safer incident scene and reduced liability for the City. Training capacity will extend to other city departments with additional training requirements that can be met by these upgrades.
Payback Period	High	Payback is immediate, as safe employees experience fewer injuries and fewer worker's compensation claims. Successful outcomes on emergency scenes are the ultimate payback for community members.
Sustainability (effect on environment)	High	A proper functioning live burn facility and the addition of training props will afford a training environment that duplicates the natural structures and incidents to which we respond. These training props save the natural bluffs and lands that we would otherwise need to physically train on to master skills competency. the live burn facility also reduces the need for acquired structure fire training and eliminates the atmospheric hazards associated with burning old structures for training purposes.
Cost to Operate/Maintain (effect on Operating Budget)	Low	Equipment is low maintenance after initial installation. Engineering analysis and modifications are required every five years.
Revenue Generation	High	Revenue source as used by outside agencies.

The IT Department implements a comprehensive lifecycle policy for managing end user technology equipment. This includes purchasing warranties for new equipment to cover the expected life of the item, recycling out of warranty equipment to other non-critical areas within the city, and auctioning off old equipment to offset the cost of purchasing new equipment. We are at the mercy of vendors such as Microsoft. Due to COVID, there was a significant increase in laptops. Laptops are due to be replaced 2 years sooner than desktops and laptops cost slightly more than twice as much as desktops.

E26335 Maintenance Pickup(No Funding in
2027)**Total Funding****\$65,000**

Purchase maintenance pickup to replace existing airport owned heavy duty pickup.

New/Used: New
 Replacement/Addition: Replacement
 Asset being Replaced: 2020 Chevy 2500 or 2020 Chevy 3500
 Condition of Asset being Replaced: Good
 Odometer Reading/Hours: 14000
 Standard Replacement Cycle: 10 years
 Estimated Life of Equipment: 10

Justification:What is the request's desired outcome?

Replace existing 3/4 or 1 ton pickup with like-size 3/4 or 1 ton pickup.

What is the purpose of this expenditure?

Scheduled Replacement, Replace worn-out equipment

What is the justification of this request?

The airport retained two heavy duty pickup trucks when the fleet replacement program was implemented. These two pickups are utilized for high wear and tear work, to include crack filling airport pavement, painting airport infrastructure, and facilities maintenance. These activities are not conducive to meeting the goals of the fleet replacement program as they drastically impact the resale values of the vehicles. The current heavy duty trucks will be ready for replacement at this time.

Approval & Oversight:Has request been approved by an oversight board?

Yes by Aviation Board on 1/16/2024 (see Legistar 24-0086)

Has request been reviewed by the Purchasing Buyer?

No

Expand service

What is the justification of this request?

The city has a water consumption of 1.8 Ft per hour, one well produces .6 ft. per hour. We have one current portable generator and 3 stationary well generators. Two of those stationary generators power wells that are high in manganese and are each 30 years old needing replaced. To ensure in the event of emergency we can provide clean water to match the cities rate of consumption is highly important. This additional generator will give use the backup and the option to run our system normally regardless of circumstance.
