See Exhibit B RPR for Duties. See Exhibit 1 Standard Terms and Conditions (SEH 06.21.19). See Exhibit 2 Level of Effort.

2. Our team will review and approve or take other appropriate action with respect to Shop Drawings and Samples and other data that the Contractor is required to submit.
3. SEH will provide Construction Observation Specialists to observe and document the construction activities for the construction activities. During the underground utility improvements, SEH will be providing observation on a fulltime basis to correlate with the Contractor's operations (40 hr./week). Our specialists will provide written site reports to City/Utility staff each time a critical inspection takes place on site. During

full time observation, our specialists will keep a daily diary for documentation and reporting to City/Utility staff.

Task 3- Materials and Dewatering Management

Construction activities are expected to occur in areas of known contamination (soils and groundwater). WDNR requires proper management of soils and wastewater during construction. Further, WDNR requires post-closure modification reports to be submitted. A draft Soils Management Plan was provided in the construction specifications bid package as a template dated June 9, 2022.

1. Materials Management Plan

In accordance with site specification sheets, permits and plans, contaminated soils are to be properly managed and disposed of at the La Crosse County Landfill or other licensed facility. Handling the contaminated soils in this manner ensures a formal approval from WDNR on a materials management plan to not be necessary; however, a plan and notification is provided to WDNR. Consultant will work with Client to update and submit a materials management plan, based on the template provided in the specification documentation (refer to spec sheet 02 60 10). This plan shall be provided to WDNR prior to excavation in any area with identified contamination.

2. Dewatering Permit and Discharge Management Plan

Consultant can provide assistance to the contractor to apply for and obtain necessary dewatering permit(s), and develop an appropriate Discharge Management Plan. The permit and discharge management plan shall be obtained and submitted prior to any excavation in areas where groundwater will be intercepted. Since the full extent of the dewatering area is unknown, additional fees for the permit and plan may be required.

3. Continuing Obligations Assessment and Post-Closure Modifications

Several areas where construction will occur are within Closed Response Action Sites with Continuing Obligations (refer to spec sheets 01 35 45 and 02 60 10). Post-Closure Modifications (PCM) must be submitted to WDNR. PCM requests shall be submitted prior to any work on a site with Continuing Obligations, and final reports shall be submitted to WDNR upon completion of work. Consultant will work with the Client to draft and submit necessary PCMs, using DNR Form 440-237 (refer to WDNR Guidance RR982). Since the full extent of the modifications is unknown at this time, additional fees (permit and plan review) may be required.

For each task that includes a deliverable, Consultant will provide Client with a draft document to review. Consultant will provide explanations of the content of the document and will incorporate Client comments into final documents.

Consultant proposes to include at least three (3) site visit and meetings with Client, as may be necessary. Site visits and meetings will allow opportunity to discuss plan review, proper materials management, and development of records necessary for post-closure modifications.

Subtotal: \$20,800

Task 4- Developer Coordination

The Consultant will coordinate with developers and provide street and utility data as requested to aid in their development plans. The Consultant will assist with coordinating temporary access to the site(s) between the Client’s prime contractor and the developer’s contractor. The Consultant will attend onsite meetings as requested by the Client.

Subtotal: \$37,900

Task 5- Project Management, Construction Administration and Accounting

Project management and accounting activities including coordination, review of pay requests, records keeping, responses to RFI, contract administration, and monthly invoicing.

Subtotal: \$72,200

Schedule

SEH will begin work as soon as authorized by the City. Below you will find a tentative schedule that can be used to estimate project milestones timelines assuming the construction schedule falls between April 2024 to June 2025 as shown below.

The payment method, basis, frequency and other special conditions are set forth in attached Standard Terms and Conditions (Service Contracts)(SEH 06.21.19).

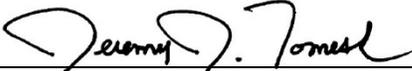

This Agreement for Professional Services, attached Standard Terms and Conditions (Service Contracts)(SEH 06.21.19), Exhibits and any Attachments (collectively referred to as the “Agreement”) supersedes all prior contemporaneous oral or written agreements and represents the entire understanding between Client and Consultant with respect to the services to be provided by Consultant hereunder. In the event of a conflict between the documents the Agreement for Professional Services and the Standard Terms and Conditions (Service Contracts)(SEH 06.21.19)(including scope, schedule, fee and signatures) shall take precedence over attached Exhibits. This Agreement may not be amended except by written agreement signed by the authorized representatives of each party.
