Hi Erin! My name is Theresa Moore and I was at the meeting last night. I have been going to all of these meetings regarding the Rivercrest community, as my daughter and granddaughter are being affected by this. They reside in 4801 Rivercrest Drive. I have been struck by the obvious lack of communication between the park owners and the city, due to a deep conflict between the two. I am hoping that this can somehow be set aside, and decisions be made in the best interests of these low and fixed income families. They are just trying to live in peace and do the best they can in this situation, that is no fault of their own. It is draining them with fear and worry hanging over them every day that this continues on, and is affecting their health and well-being. We were instructed to cut our speeches short last night, so I didn't mention the idea of the city using the west side of the canal for access to the do their maintenance and repairs. There is a wide open park, that is barely used, and would be easier to access from city roads, rather than driving through a long narrow mobile home court road, filled with little children. Could Matt Gallagher please consider this as an option and alternative to tearing down the mobile home park, and 6 families lives, for use as a job site. I am very tired of the fact that everyone is looking at this situation from a business point of view and so narrow minded, rather than the affect it is having on the families who reside there. Can you please pass this on to other city council members? My husband and Christina LaBeff's father served on city council and county board 25 years ago and he always put the best interest of the people at the center of his decisions, and I can see that you do the same, and that is why I am reaching out to you. Thank you very much for caring and serving. Unfortunately, I am not getting the same feeling from Mark Neuman, which is the other reason I am writing to you.
