Andrea,

Thanks for speaking with me on the phone.

Attached is the aerial of where Northern Natural Gas will be installing the revetment mat along the WIB 11901 16" pipeline. The revetment mat will reinforce the existing pipeline and help mitigate erosion from the river.

I have also attached the existing easements that gives Northern Natural Gas the ability to maintain their right of way and pipeline system.

Northern Natural Gas and their contractor will be gaining access to the right of way from causeway Blvd and Buchner Pl.

Survey will need to access the site to complete a topographic and environmental survey in the coming weeks.

Please let me know if the Redevelopment Authority for the City of Lacrosse has any questions or if anything is required through their office.

Thanks for your attention in this matter.

Respectfully,

Stephen Sullivan
