MEMORANDUM

To: Board of Public Works
From: Bernard Lenz, Utilities Manager
Date: 06/21/2021
Subject: Well 20 Repair

Well 20 has experienced gravel pack being pumped up into the well house, resulting in the well having to be shut down. The well was pulled and inspected, finding a well casing failure at 88 to 90 feet of depth that allows the gravel pack to enter the well. The Water Utility has obtained quotes to use a Packer Rig to band the casing as a permanent fix. A similar fix has been used at another City well with success.

The Water Utility requests BPW approval to hire Municipal Pump and Well to perform this work. Money in the Water Utility operating budget for well maintenance will be used to fund the repair.
