

- **Sec. 103-102. - Disposal of water and other liquids.**

(a) It shall be unlawful to deposit any water or other liquids on public land or to permit such water or liquids to drain over, into or upon the public sidewalks, streets or alleys. The Fire Department - Division of Fire Prevention and Building Safety is authorized to require property owners to connect to the storm sewer when such sewer is available, or to other means of disposal acceptable to the Department, when, in the Department's judgment, the roof area of the building, its proximity to public lands, the amount and density of adjacent surfaces, and other circumstances, will necessitate connection to prevent excessive adverse accumulations of water and ice on the public lands. No water shall be drained to the street gutter except with the written permission of the Department of Public Works.

(b) Roof water and other waters and liquids shall be drained from buildings in such a manner as to protect the building and in no case shall water be permitted to drain directly down the walls of buildings or be deposited upon or near the building foundations.

- **Sec. 46-76. - Drains and sewers required.**

It shall be the duty of the Board of Public Works to see that proper drains or sewers are constructed from every lot which in their judgment requires it; and that such private drains or sewers are made to connect with the public sewers in a proper manner and they shall have the power to require such number of private drains and sewers to be constructed as they may deem expedient.

- **Sec. 46-77. - Private drains and sewers.**

The Board of Public Works shall prescribe the location, arrangement, form, materials, and construction of every drain and sewer emptying into the public sewers, and shall determine the manner and plan of connection of the same. The work of construction shall be in all cases subject to the superintendency and control of said Board and shall be executed strictly in compliance with their orders, but the cost of such private sewers shall not be included in the estimate of the cost of the general plan of sewerage and shall be charged upon the lot or lots for the benefit of which such private sewers shall be constructed.
