

Mission Statement

The City-School Swimming Pool Planning Committee will explore opportunities for the City and the School District to collaborate on an area of mutual interest, our pool facilities. The Committee will evaluate the status of our current pools, explore opportunities for meeting our community's needs through collaboration, explore opportunities for partnership with other organizations in our community, and refine options to present to the School Board and City Council for consideration. The objective of the Committee is to develop options that meet our collective needs, create efficiency, increase opportunities for our students, and improve the amenities for our residents.
