This letter is to address the security of the boat landing on Fisherman's road north of what is known as Airport beach .

If the City of LaCrosse authority considers opening access to the boat landing for the exclusive use of River City Water Ski Team we would secure it in the following manner.

With use of the current barricades that are currently there and we would run a chain across the access point to the water. This chain would be secure with a contractor grade padlock. Also blaze orange sign would be placed in the middle of chain at the access point for safety purpose.

Only our boat drivers would have access to the landing and would only be used during our sanctioned practices and shows.

Thank you again for consideration of opening this boat ramp for the ski team.

John Aschenbrenner
River City Water Ski Team
