Good Afternoon Jacky,

I hope this email finds you well.

Baycom is in the process of adding a new Holmen site to the La Crosse County communication system. As part of that project, we will need to update some of the Counties microwave equipment at the MVC site. I am not sure if we route this discussion through you, or if there are other channels we need to involve? The scope of upgrades and site adds are detailed below to give you an idea of what the scope of work is looking like:

- Replace an existing 4' dish with a 3' dish at about 105'
- Replace existing 7/8' coax with waveguide coax to that dish
- Add a new 6' dish at about 100'
- Add waveguide coax to that dish
- Inside the shelter there will be an addition microwave radio added to the La Crosse County rack

Overall the scope is pretty minimal, but necessary to ensure the County has a feasible microwave path in place moving forward.

Can you let me know how this needs to progress on your end and I will loop in our Engineering team and the County folks from there.

Thanks in advance for your guidance on this.

Mike
