636327	11/12/2020	Lots of great ideas! What are your thoughts of providing classes for parents? I can imagine that the stress to be healthy and effective parent is high.
636293	11/12/2020	You have forced businesses to be at 25% capacity and then wonder where to spend this money? How about give it to every business you're mandating to be at 25%???
637281	11/13/2020	How about you guys help the college students that were left out of the stimulus deal and are struggling beyond belief right now? Most of us did not get a stimulus check and we can barely afford to eat due to jobs being limited due to COVID. Every single plan we have seen from government entities has left us college students out, it's about time someone included us and recognized that we are one of the most at-risk populations during this time.
636940	11/12/2020	I think additionally there needs to be more support for long term care facilities. This is where most of the deaths are occurring. What can be offered to these facilities? I'm sure many staff are burnt out and could really use some extra incentive right now.
636898	11/12/2020	Why can't any business grants help non-profit organizations? American Legion Post 52 needs a lot of help.
Police FB	11/12/2020	Huge administration fee in this grant. Who and what gets this. If these are city employees they are already paid, I thought.
Police FB	11/13/2020	I just saw that admin. amount of \$28,000 and wondered who this is for and why if city employees get paid (hopefully for doing their job) why is this amount in the grant??
637953	11/13/2020	Homelessness is a problem that we need to address.
LAX FB	11/12/2020	Build a community in the tax vacuum known as Riverside North. Half a million would clean it up enough to entice contractors and get the ball rolling. Build a community block, Riverside North, exactly what it's intended for.
652757	11/24/2020	Of these proposed areas, Contact Tracing is the least likely to be successful. CDC report 6 days ago: Based on existing literature, the incubation period (the time from exposure to development of symptoms) of SARS-CoV-2 and other coronaviruses (e.g. MERS-CoV, SARS-CoV) ranges from 2–14 days. My opinion: the number of contacts and secondary contacts will be quite high and they will be better informed by the affected party "spreading the word" and asking for safety precautions to be taken. Spend the money somewhere else.
655008	11/25/2020	Small business support
