Subject: Prebuilt Shed Purchase for Yard Waste Site

Refuse and Recycling would like to purchase a prebuilt shed for the yard waste site.

The new shed would be used to store signs, hand tools and space for the employees working at the site. There are currently 2 buildings at the site that are beyond repair due to water, mold, and age of the buildings.

We solicited 3 quotes for this purchase.
We received 2 quotes.

Dakota Storage Buildings- \$17,416.84
Old Hickory Buildings- \$13,872.51

I am recommending that the shed be purchased from Dakota Storage Buildings. There were options we wanted that Old Hickory Buildings did not have when designing. The other factor is that some of the materials going on the shed have a longer life span and that will help with maintenance costs in the future.

Purchase will be from the yard waste sticker sales account.
