About La Cro Products

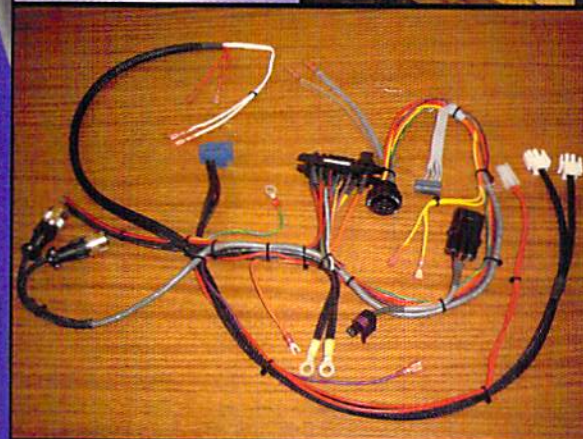

La Cro Products is a contract manufacturer of cable assemblies, wiring harnesses, wire products and light assembly for a wide variety of applications. Incorporated in late 1959, production started in 1960 with American Motors Corporation producing electronic assemblies. As the business grew, relationships with IBM, Hewlett Packard, Sun, Cisco, Onan Generator, and many smaller companies were developed.

La Cro provides assistance with design, development, and manufactures to customer requirements. Our equipment, including automated lead-making systems, allow production capabilities in excess of 1/2 million leads per week.

Our Capabilities

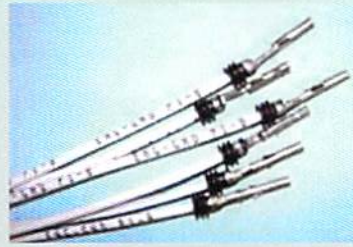

La Cro provides manufacturing and engineering capabilities which include:

- Assist With Design Definition and Document Preparation
- Component Selection and Sourcing
- Material Management, and Warehousing
- Quick Turn and Prototypes
- Wave Soldering
- Mass Termination and Tie Wrap
- Cut and Strip 32awg to 4/0 Cable
- Hot Stamping and Ink Jet Printing
- Quality through Testing and Inspection
- ISO 9002/2000 Compliance
(Certification to Follow)
- General Light Assembly

Many applicators and hand tools in stock, available to crimp most terminals

Products

Wire, Cut and Terminated

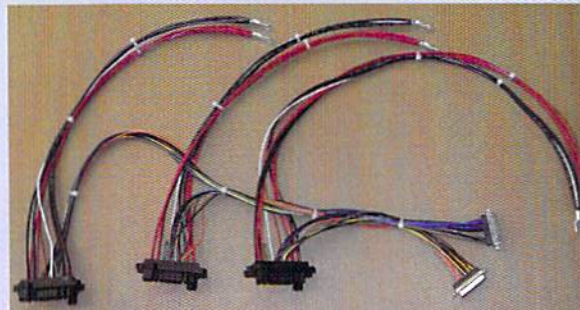

Flat Ribbon

Multi Conductor Cable

Wire Harness Assembly

Equipment

Komax Gamma 333

- Automated Leadmaker, 10awg to 26awg, to 32 feet
- Strips one or both ends, slugs can be left on.
- Terminates one or both ends. Leads may be hot stamped or Inkjet printed.
