

# Agenda Item Summary

Project Name: La Crosse Center Expansion & Renovation

---

## La Crosse Center Board Meeting

### 1. Artwork/ Arts Board Collaboration

- a. Recent discussion with the Arts Board led to a recommendation to focus artwork installation in the new expansion. ISG worked with LCC staff to identify a location in the North Lobby (at the top of the Entrance Hall stair/ escalator/ elevator) that we think would be a good location. The space has a tall ceiling height so a wall mounted artwork can be held higher off the floor to avoid pedestrian or cleaning equipment damaging the installation. Also, we think this is a great focal point as guests arrive at the top of the Entrance Hall stair/ escalator/ elevator.

### 2. Furniture Selections

- a. Pre-Function Public Spaces
  - i. The furniture selections in the pre-function public spaces are based on comfort, durability and flexibility. Some events will require no furniture in the entrance hall/ outer lobby, while other events prefer having it for a warmer space environment. Color selections are based on building interior design color selection previously determined.
- b. Office Furniture
  - i. Office furniture selections are based on discussions with LCC staff to determine storage and space needs. Offices will have 2-4 guest chairs for quick collaboration meetings.
- c. Break Room
  - i. Break Room furniture selections are based on durability and cleanability. Colors have been selected that coordinate with space interior colors.
- d. Roof Terrace
  - i. Outdoor furniture selections are based on flexibility, durability and comfort. The center table with fireplace is to have LP gas tank fuel source so tables can be moved around as needed.
- e. Ballroom & Meeting Room
  - i. The team looked at multiple chair types for the ballrooms and meeting rooms. Options ranged from cushioned seat & back, cushioned seat with plastic back and plastic seat & back. The ergonomics of the plastic seat/plastic back chair were preferred by design team and LCC staff. The plastic seat/plastic back chair allows for easier setup/ tear down & chair storage. Also, for events such as weddings, the plastic seat/plastic back chairs often have decorative covers on the back rest for decoration.
