Background Information

The subject CSM is part of the Copper Rocks Development. The applicant is requesting to subdivide the existing lot the former KMart building was located on into four separate parcels as part of the proposed, new development. The new development consists of five buildings that include three multi-story, mixed-use buildings and two townhome buildings. The townhome buildings are proposed to be located on one of the lots and each of the other three buildings will each be located on the other three.

Subdividing the parcel in this way will likely require drainage, utility and access agreements as part of the final approval of the CSM.
