Re: Request for sewer variance

We are requesting a variance to leave the sewer connections the way they presently are for the properties at 514 and 526 Mississippi Street. The same buyer (CouleeCap) is buying both properties. We were not aware that this or the shared water would be a problem when we negotiated the sale.

Chad Viner of Viner Plumbing just told us that he has worked on that street and that the brick sewer is huge and old and that you can't tap into that. It is 30 feet down.

We realize that a five foot easement will be needed if this is approved.

Thank you for your consideration.
