Hi,

I filled out the survey about Green Bay Street, and forgot to add comments about motorized bikes and scooters.

I believe that there should be a speed limit for bike lanes, equal to what an athletic cyclist could achieve by pedaling. If an electric bike is going faster than that, it should be on the street, just like a motorcycle. I believe that electric scooters should be outlawed. If not outlawed, they should be in the bike lane and required to respect the speed limit of the bike lane. A scooter should never be permitted to go faster than the bike lane speed limit.

Thank you for gathering community input.
