Industry Leading Pothole Patching Equipment

Solving Problems, Addressing Needs

At Stepp Manufacturing, our engineers produce equipment that is known in the industry for its durability, reliability and functionality. Since our beginning in 1942, our family owned operation has always produced equipment specific to your needs. We use high quality materials, innovative engineering, and quality personnel to match your needs as they grow.

Welcome to the Future of Pothole Patching

Stepp Mfg.'s SPHD dump style pothole patcher is the King of Hot Boxes, designed with the end user in mind. The low profile design and dumping capabilities, joined with an oil jacketed heating system, make this the most advanced patching trailer in the world. The Stepp SPHD Dump Trailer is designed with the GREEN friendly exhaust that is reused for better burner efficiency, putting the environment first and putting "Green" back into your pocket.

Stepp Mfg.'s dump style pothole patcher is used to heat and reclaim both hot mix and cold mix materials and apply them to roads, parking lots, and bridge decks to repair potholes and utility cuts. The Stepp SPHD dump style pothole patcher is offered with an oil jacketed, diesel fired heating system with a recirculating exhaust system to create a "Green Friendly" heating system. Coupling that with the market's lowest profile, 12,000# hydraulic truck hoist, and gas shock assisted top and rear doors makes this an industry leader that will give you a safe, reliable, and operator friendly machine for years to come.
