

Attn: Utilities Committee

In the interest of the property located at 415 Ferry st., we are hereby submitting request for an extension on timeline to connect to the new sewer lateral. Sellers have accepted an offer on their home and will be closing March 13th. They are requesting an extension to complete the work to June 1, 2020 at the latest so we have ample thaw time for excavation. Attached is the estimate for the work to be done under conditions of thawed soil. The funds will be escrowed to ensure the work is completed. Thank you for your consideration.
