Subject: Rezoning of 200 Block of Route 5 La Crosse, wis

When this rezoning was done a couple of years ago we were told by some council members that if we had a petition showing 75% of the home owners were against it then it would not go thru. Well at that meeting we felt good because they voted in our favor. Well at their next meeting all of a sudden they all voted for it. So our petition and our concerns did not matter. Make you wonder who got to them. This time our neighborhood all signed a petition against it again and once again the common council at the first meeting were dead locked. We will see the out come this Thursday night and if it all of a sudden gets passed again we will know something is fishy. We will then go out to the local media, channel 19 13 and 8 and the La Crosse Tribune and let them know what is going on. If need be we will join together and get a lawyer to deal into the situation. People that live in this neighborhood should have the final say in this matter not the council members who don't have to live here.

There are so many factors that make this not good for our neighborhood. Open your eyes to the problems in apt. building would cause for the people in this area. Noise, Drugs, Parking, flooding, theft would rise in the neighborhood. More traffic in the alley. More trash.

If this apartment goes thru who do we people sue if we get damage due to this construction. Do we sue Mr. Skelton the owner or the city for letting it go up. Maybe both. We the people care about a decent neighborhood. Once he gets his way who is going to make sure he keeps the drug up. The first rezoning should have never happened if the council kept their word.

The Neighborhood
