VISTA DEL RIO STORM SEWER REPAIR & RESTORATION

As Owner of the property identified as Lot 37; Block _____;
Sheehan - 4411 E Camino Real Drive Addition,

I hereby: (Please circle a choice below.)

OBJECT TO THE STORM SEWER REPAIR & RESTORATION.

I AM IN FAVOR OF THE STORM SEWER REPAIR & RESTORATION.

Proposed as an Improvement at the following location:

(_____).

My reason for filing an objection is the cost of the special assessment and the manner in which it was calculated. Our assessment was \$3,627. My husband and I received no input or explanation from the city engineering dept. regarding this. Also, in regards to our property, I believe the run-off on the east side of our home pools in an area by our fence and is absorbed in landscaping and grass and does not reach the drainage system. We have a culvert on the west side.

In our opinion, this restoration does not benefit our property; and

in fact, may not benefit any property listed on the two pages (except for the two properties involved). These properties are at the end of the drainage system.

The area involved for the improvements has been an issue for many years. The President of our HOA has reviewed this issue many times with the city with no results. Work done earlier may have prevented this area getting as bad as it has.

We are already paying storm water fees on our water bill. This fund should be used to restore this area. One suggestion could be to increase that fee for all of La Crosse.

In speaking with the city engineers, I learned that the storm water costs have always been paid entirely by the city. No assessment has ever been placed on properties regarding storm water issues. We should not be singled out to pay for this work!

Pat Houlihan will be attending this meeting.

My reason for filing an objection is WE PAY WATER TAXES IN
LA CROSSE ALREADY. IT SEEMS UNFAIR TO ADD
EXTRA BECAUSE THE DRAINAGE WAS NOT PROPERLY
PLATTED INITIALLY.

My reason for filing an objection is we feel like property
tax should more than cover the expenses of
repair & restoration of the storm sewer.
