Dear Council members,

I am writing in support of Resolution 22-0977, declaring a climate emergency and accelerating the clean energy transition. I'm not a climate scientist, but I am a conservation biologist, and I've studied how the different parts of the natural world interact. When I hear about what's happening across the country and around the world right now because of climate changes, it scares me. There is no doubt that these climate impacts have reached crisis level and humans are responsible - the only uncertainty left is how bad it will be. All of us need to do what we can, from our households to the global level, and take serious action to avert the most serious impacts. In your role as council members, you have the opportunity to lead our community toward a healthier, more sustainable future by supporting the transition to clean energy through this resolution. Please vote yes.

Thank you,
Kathy Allen
