Dear Council Members,

Please make a statement about our city's understanding of climate change urgency by passing the climate emergency resolution. Current events such as floods, droughts, and heat waves show that now is the time to severely limit greenhouse gas emissions. This resolution will reiterate our pledge to take action and prepare the way for the city's climate action plan coming later this year. It will connect us to the millions of people who are working to declare a global climate emergency. Please pass this resolution rather than sticking with the status quo simply because it had been easier and more profitable in the past. Our world- including the Driftless region- is changing.

Thanks for your service to the community.
