Position Title	IT Enterprise Services Manager	Department	Information Technology (IT)
FLSA	Exempt	Reports To	Director of Information Technology
Pay Grade	13	Unit	Non-Represented
FTE	1.0 FTE		

Purpose of Position

The purpose of this professional exempt position is to supervise and lead the GIS and Development Services Division of the Information Technology Department. The incumbent is responsible for professional and complex projects designed to analyze business problems, collaborate with internal and external customers, plan, design and manage technology initiatives, including streamlining processes and procedures, reducing expenses, and increasing efficiencies. The incumbent must possess excellent written and oral skills, as well as excellent listening and interpersonal skills. The incumbent must be self-motivated, and capable of working in a team-oriented, collaborative environment. The incumbent must have a keen attention to detail and proven analytical and creative problem-solving abilities. Position performs confidential tasks and exercises significant latitude to make independent decisions and commit city resources. The work is performed under the direction of the Deputy Director of Information Technology as well as the Director of Information Technology.

Essential Duties & Responsibilities

The following duties are normal for this position. The duties and responsibilities are not toe be construed as exclusive or all-inclusive. Other duties may be required and/or assigned.

- Supervises GIS and Development Services Division staff including the Programmers and GIS Coordinator.
 Assigns task and projects, determines operations, monitors progress. Assists in staff performance evaluations.
- Administers discipline as needed. Participates in the recruitment process for GIS and Development Services Division staff.
- Internal Software Development Team Leader. Works closely with other Programmer/Analysts to coordinate a collaborative work environment. Provides training and assistance to other Programmer/Analysts as necessary.
- Internal GIS Services Team Leader. Works closely with the GIS Coordinator to deliver Geospatial services to City end-users and the public. Responsible for long-term GIS services planning and implementation for the City.
- Schedule and prioritize work assignments, monitor and update the Deputy Director and Director on status of work in progress, reviews own work to assure work quality and timely completion of assigned duties and responsibilities. The ability to act with a sense of urgency, meet deadlines and handle more than one project/service simultaneously.
- Designs, builds and implements client server applications; migrates legacy applications to new client server technologies and performs daily application administration. Uses a variety of client and server development languages. Plans, designs and implements Application Programming Interfaces (API's).
- Designs, builds, implements and maintains web pages and sites; integrates sites with client applications and legacy applications; performs daily administration of internet servers. Uses a variety of web development languages for the creation of web pages and web services.

- Provides support and integration of third-party applications. Write programming scripts to enhance functionality and/or performance of City Information Technology systems as necessary.
- Provides Server database administration and Application hosting infrastructure administration. Recommend, schedule, and perform software improvements and upgrades. Assists and advises in ensuring IT systems are secure and reliable.
- Deploys effective test suites and regimes for in-house product development. Applies proven analytical and problem-solving skills to help validate, verify, communicate and resolve systems/software application issues through careful testing in order to maximize the benefit of IT investments and initiatives.
- Plans, designs, develops and launches efficient information systems in support of core organizational functions.
 Strategically designs and implements information systems and networked software architectures that support core organizational functions and assure their high availability.
- Analyze and assess existing business systems and procedures. Define, develop, and document of software's business requirements, objectives, deliverables, and specifications on a project-by-project basis in collaboration with internal users and departments. Define software development project plans, including scoping, scheduling, and implementation. May prepare project status reports, impacts and estimate reports, cost benefit analyses report and project plans.
- Research, identify, analyze, and fulfill requirements of all internal and external program users. Conduct research
 on emerging application development software products, languages, and standards in support of procurement and
 development efforts.
- Liaise with vendors for efficient implementation of new software products or systems and for resolution of any adaptation issues. Liaise with network administrators, systems analysts, and other programmers to assist in resolving problems with City Information Technology systems.
- Design, run and monitor software performance tests on new and existing programs for the purposes of correcting errors, isolating areas for improvement, and general debugging. Administer critical analysis of test results and deliver solutions to problem areas. Generate statistics and write reports for management and/or team members on the status of the programming process.
- Train end users to operate new or modified programs. Install software for end users as required. Prepares training material for operators and users of programs, trains operators and users on programs. Prepares and writes program and system documentation. Explain complicated and technical information in simple, non-technical language.

General IT Department Duties and Responsibilities:

- Reports observed misconduct of internet and computer usage to the Director of Information Technology and/or the Director of Human Resources.
- Must maintain confidentiality of City personnel data and other proprietary information.
