Subject: Drones, cameras, public/private partnerships

The city should not entertain any offer for, and should immediately terminate any existing contacts involving the outsourcing of public safety and police powers or capabilities to any corporation.

If we the people want our police to have these drones, cameras, and surveillance systems we will pay for it to be owned and operated by public servants. Allowing for-profit entities to control any aspect of public safety and security is a risk we should never take.

Corporations cannot be trusted to be accountable to the voters and should never be given power over them.
