Attn: Lee Anderson

RE: Well 20 – Pump Removal and Inspection - REVISED

Lee,

The purpose of this proposal is to provide you information and pricing for the Water Well Solutions service team to remove the pump from Well 20 and televise the well to inspect the condition of the screen and gravel pack.

Scope of Work:

- Load required equipment and mobilize to the site.
- Set up equipment at the site.
- Lift the pump off the base to a height that allows for the televising equipment to enter the well.
- Run televising equipment down the well to the bottom of the casing to begin televising.
- Lower pump to a depth that will allow for the pump to run at the required gallons per minute via the VFD.
- Televise the screen while the pump is running to determine where the gravel pack is entering the well.
- Provide the results and recommendations to the City for review.
- Remove pump from the well in preparation for the future steps of well repair.

Total for the proposed scope of work: \$7,300

**pricing includes mobilization, all equipment, onsite labor, televising, per diem, and demobilization.*

If there are any questions or anything else that is needed, please don't hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Laura Kerschner", written over a white background.
