

## Boulevard Planting Proposal

112 24<sup>th</sup> St S.

Dear Board of Public Works,

I would like to change the vegetation in the boulevard in front of my house to enhance, the aesthetic of the front of my home, and the habitat for pollinators. The boulevard currently has become mostly weeds and damaged turf as depicted in the attached pictures.

My proposal is to remove a portion of the soil to create a slight depression, not more than six inches below the curb at maximum depth. I would like to plant native plants similar to the attached planting plan and two boulevard trees.

As the Municipal code Sec. 34.111 requires the codes that I would like to exceed with this planting would be;

- Sec. 34.110(b)(4) limiting the total square feet of planting flowers to 50 square feet,
- Sec. 34.114 limiting plant heights to 30 inches or smaller.

Thank you for your consideration.

Jack Zabrowski
