MEMORANDUM

To: Board of Public Works
From: Bernard Lenz, Utilities Manager
Date: 09-08-2020
Subject: North Industrial Park Sewer Capacity

On July 6th, 2020 (#20-0897) the BPW approved a request from Kwik Trip to relocate a 16" Diameter Sanitary Force Main and a 12" Diameter Water Main for their Dairy Expansion Project, with staff recommendations to include a tap and valve on the force main during this project for a future connection to the dairy, and that final design be brought back to Board of Public Works for approval.

In working with Kwik Trip on this Utility move, the Utility has determined it may be advantageous to the City to partner with Kwik Trip in diverting sewer flows to this new tap location, beyond Kwik Trip's needs.

The Utility is seeking direction from the Board of Public Works to:

- work with the City Engineering Department or outside engineering council, in partnership with Kwik Trip, to evaluate options and opportunities during this Utility line move that may be advantageous to the Utility in increasing sewer capacity in the City's sewer pipe network, and
- to bring those opportunities back to the Board for consideration.
